Delete an Object

Last Modified on 05/04/2022 9:55 am EDT
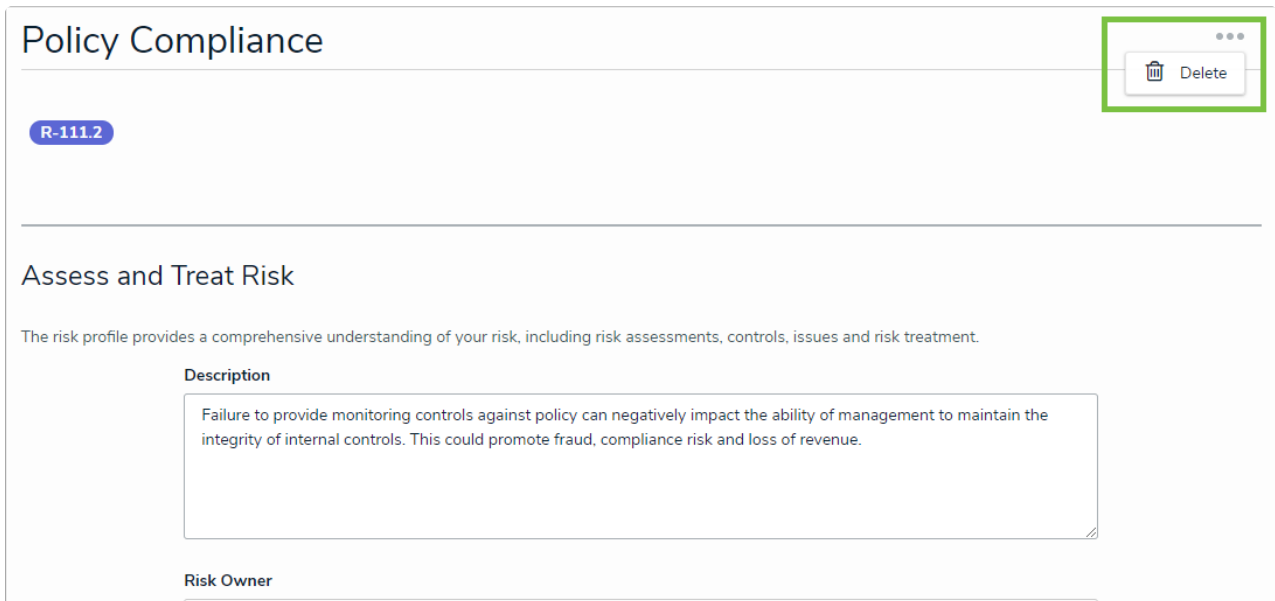

Depending on their role permissions, both administrators and end users can delete objects. However, before an object can be deleted, you must review the **Deletion Request** warning, which outlines how deleting that specific object impacts other objects connected through relationships or references.

> *i* An object cannot be deleted when it's viewed on a navigation form or from the rightside editor palette.

To delete an object:

1. Open the object form in full screen mode.

2. Click the ••• icon at the form's top-right, then click **Delete**.

3. Review the **Deletion Request**, which summarizes the number of impacted relationships and references.

4. Once you've ruled out negative impacts on those related/reference objects, click 🗑 DELETE to confirm.

The Delete option at the top-right of the page.

> ⚠️ Deleting an object with relationships or references will delete that object's connection to those other objects, but it will **not** delete the other objects to which it was related.
