

Create a New User

Last Modified on 06/13/2024 1:41 pm EDT

Overview

Every individual you want to access your Resolver environment requires a User Account. A user with Administration privileges can add User Accounts to Resolver. When a User Account is created, an Administrator must assign each User to User Groups for the User to access the Resolver environment. Only Administrators can add users to the system.

User Account Requirements

The user account you use to log into Resolver must have Administrator permission to edit the User Profile.

Related Information/Setup

For more information regarding Administrative User privileges, please see the Administrator Overview article.

Navigation

1. From the **Home** screen, click on the **Administration** icon.

Administration Icon

2. From the **Admin Overview** screen, click on the **Users** tile under the **People** section.

Users Tile

3. From the **Admin Users** screen, click the **+ Create User** button.

+ Create User Button

Creating a New User

1. From the **Admin Create User** screen, enter the user's name in the **First Name** and **Last Name** fields.
2. Enter the user's email address in the **Email** field. The email address is used to:
 - Receive the Resolver sign-up email containing instructions on creating a new password and signing into Resolver.
 - Authenticate the user when logging into Resolver.

Create User Screen

3. **(Optional)** The following toggle switches are options settings and can give users absolute access or visibility in the system:
 - **User Enabled:** Click the **User Enabled** toggle switch to deactivate the user account. By default, the user account is enabled.

- **Admin:** The Admin toggle switch gives users Administrative privileges with the potential to cause irreparable system damage.
- **All Access:** The All Access toggle switch allows Users to view, edit, and delete Objects and Object Types. The **All Access** toggle switch overrides Object Type Workflow permissions.

Warning:

*Resolver recommends not enabling the **Admin** or **All Access** toggle switches on for new user accounts.*

Optional Toggle Switches

4. **(Optional)** Select a language from the **Language** field dropdown menu to change the system's language setting. Before you can set an alternate language setting, an Administrator needs to download a Languages .csv file from the system, map language translations to the user interface text, and upload the .csv file for use within Resolver.
5. Click the **Create** button to create the new user account.
