

Create a New User Group

Last Modified on 12/11/2024 4:01 pm EST

Overview

An Administrator can add new user groups to the system. A user group organizes system users into specific groups based on their organizational role (e.g., Employee, Management, etc.). Adding users to a user group allows an Administrator to assign multiple users within a user group to a role by assigning the user group to a role instead of manually assign a role to each user.

User Account Requirements

The user account you use to log into Resolver must have Administrator permission to access the *Admin Overview* screen.

Related Information/Setup

Please read the User Group Overview article for more information regarding user groups.

Navigation

1. From the *Home* screen, click the **Administration** icon.

Administration Icon

2. From the Administrator settings menu, click Admin Overview.
