Edit or Delete an Application

Last Modified on 02/05/2019 12:13 pm EST

To edit or delete an application:

1. Click the ⚙ icon in the top bar **> Applications** in the **Application Management** section.

> ✅ You can rearrange the order of existing applications on the **Applications** page by clicking the ‖ icon next to an application then dragging and dropping the application to new a location on the page.

2. Click an existing application to display the **Edit Application** page.

Admin : **Edit Application**

Risk Management ✏

Activities

+ CREATE AN ACTIVITY

Identify Risks ✖ ‖
Manage your internal risk library including adding and updating risks across the organization. Input new risks and categorize by process, risk category or objectives.

Launch Risk Assessment ✖ ‖
Launch risk assessment by identifying relevant risks for each business unit and assign risk owners for analysis.

Assess & Treat ✖ ‖
Perform periodic assessments of inherent and residual risks, understand contributing factors and consequences to your risks, and attach mitigating strategies to your high risks.

The Edit Application page.

3. To edit the name or description of the application, click the ✏ icon next to the application's name at the top of the page.

4. To delete the application, click the 🗑 icon, then click **Yes** to confirm.

> ⚠ Deleting an application will delete all activities associated with it.
