

Object Type Universe

Last Modified on 02/01/2019 4:43 pm EST

The **Object Type Universe** graph helps you visualize how all the object types in your org are associated with one another through [relationships](#).

You can reveal the name of an object type by hovering your cursor over the monogram. The gray arrows indicate which object type the relationship is saved to. For example, in the screenshot below, the Incident object type is associated with the Vehicle object type through a “Vehicles Involved” relationship.

The Object Type Universe graph.

To view the Object Type Universe graph:

1. Click the  icon in the top bar > **Object Types** in the **Data Model** section.
2. At the bottom of the **Object Types** page, click **View Object Type Universe** to display the graph.

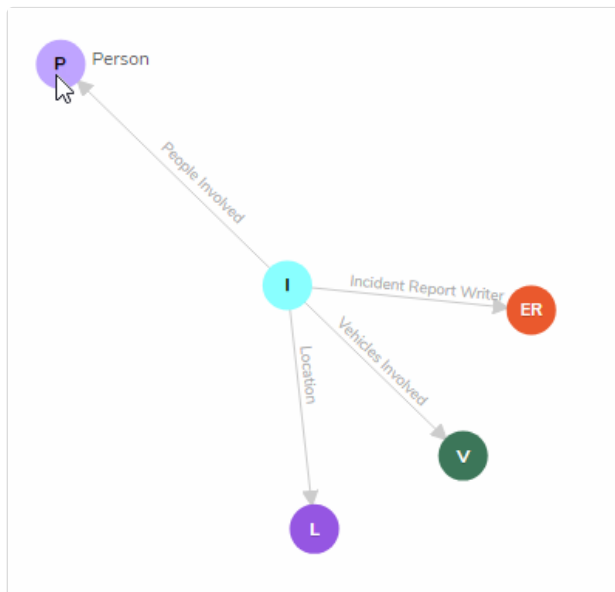

Admin: **Object Types** + CREATE OBJECT TYPE

- ER Employee Record
- I Incident
Records of any activities or serious incidents that occurred on or near com ...
- L Location
- P Person
- V Vehicle

VIEW OBJECT TYPE UNIVERSE

The Object Types page, displaying the View Object Type Universe link at the bottom of the page.

3. To rearrange the location of a single object type or a cluster of object types, click and drag it to a new location on the graph.

Clicking and dragging a cluster of object types to a new location on the graph.

4. Click an object type on the graph to view its **Edit Object Type** page.
5. Click the back button on your browser when finished to return to the **Object Types** page.
