

Object Type Universe

Last Modified on 09/20/2024 4:49 pm EDT

Overview

The **Object Type Universe** graph helps you visualize how all the object types in your Org are associated with one another through relationships.

You can reveal the name of an object type by hovering your cursor over the monogram. The gray arrows indicate which object type the relationship is saved to. For example, in the screenshot below, the Incident object type is associated with the Vehicle object type through a "Vehicles Involved" relationship.

An Example of an Object Type Universe

User Account Requirements

The user must have Administrator permissions in order to access the *Admin Overview* section.

Related Information/Setup

Please refer to the Object Types section for more information on using object types in Resolver.

Navigation

1. From the *Home* screen, click the **Administration** icon.
