

By Leaf

When the **By Leaf** tab is selected, the data definitions are organized alphabetically by the last object type in the data definition. All definitions displayed in the **By Leaf** tab are [focus eligible](#). Clicking on a definition will display the **Edit Data Definition** page, where you can [edit](#) or [delete](#) the definition.

The screenshot shows the 'Admin Data Definitions' page. At the top right, there is a blue button labeled '+ CREATE DATA DEFINITION'. Below the header, there are two tabs: 'By Anchor' and 'By Leaf', with 'By Leaf' being the active tab. A text block explains: 'The Data Definitions are grouped by the leaf Object Type, where all Data Definitions end on the same Object Type'. Below this, a section titled 'L LOCATION' contains two rows of data definitions. Each row has a text label and a 'REPORT FOCUS ELIGIBLE' button.

Object Type	Label	Action
Location	Location Definitions	REPORT FOCUS ELIGIBLE
Location	Location only	REPORT FOCUS ELIGIBLE

The Data Definitions page with the By Leaf tab selected. The definitions are organized by the last object type in the data definition.
