

Filtering the Data Management Audit Trail

Last Modified on 10/16/2023 11:02 am EDT

Overview

The **Data Management Audit Trail** feature lists all Object changes made in an Organization.

User Account Requirements

The user account you use to log into Resolver must have Administrator permission to use the Data Management Audit Trail feature.

Related Information/Setup

Please refer to the [Exporting Data Management Audit Trail Records](#) article for information on exporting records from the Data Management Audit Trail.

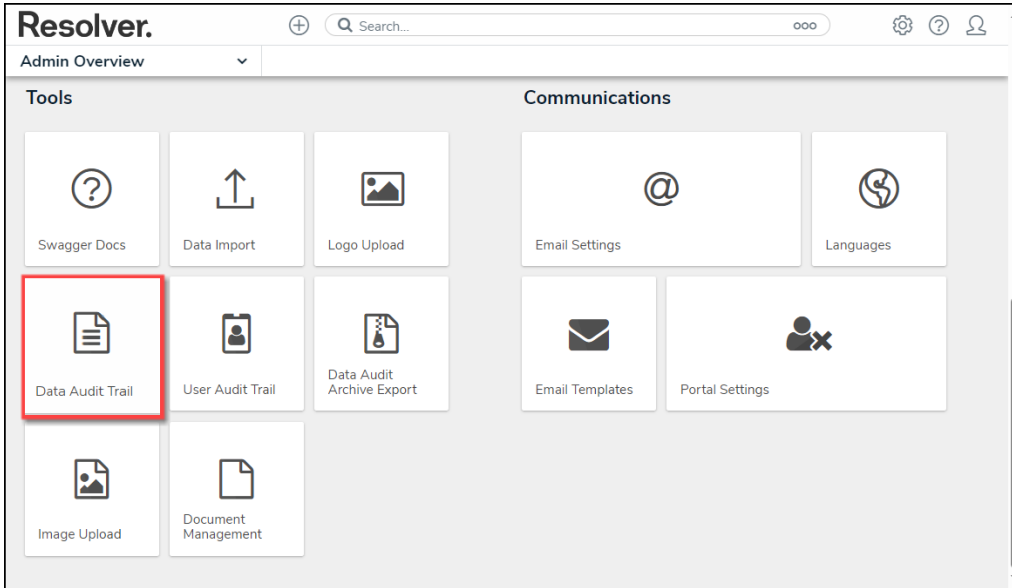

Navigation

1. From the **Home** screen, click the **System** icon.

System Icon

2. From the **Admin: Overview** screen, click the **Audit Data Trail** tile under the **Tools** section.

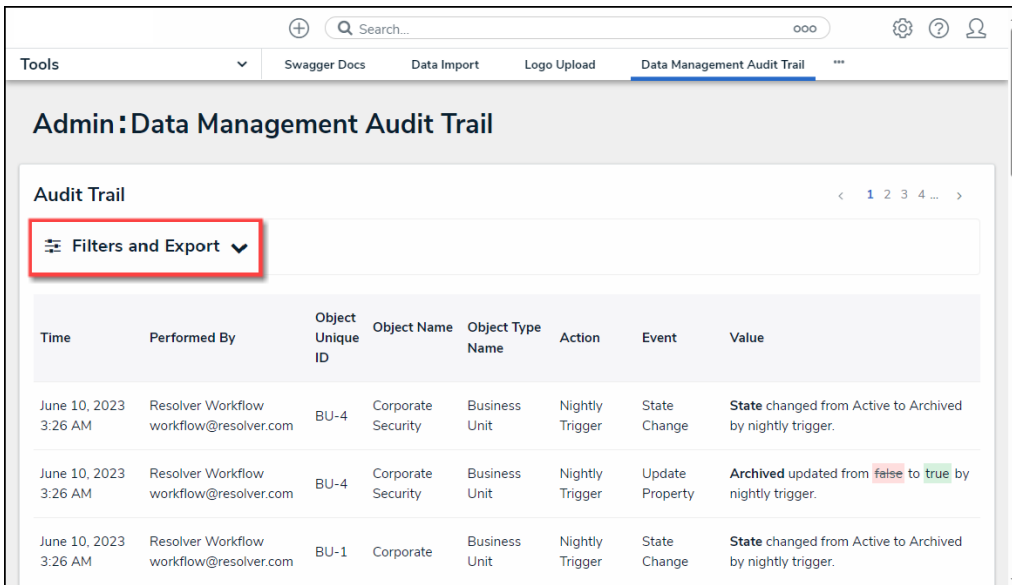

Audit Data Trail Tile

Filtering the Data Management Audit Trail

By default, the **Data Management Audit Trail** displays an Organization's changes in reverse chronological order. Follow these steps to create a more targeted Data Management Audit Trail view.

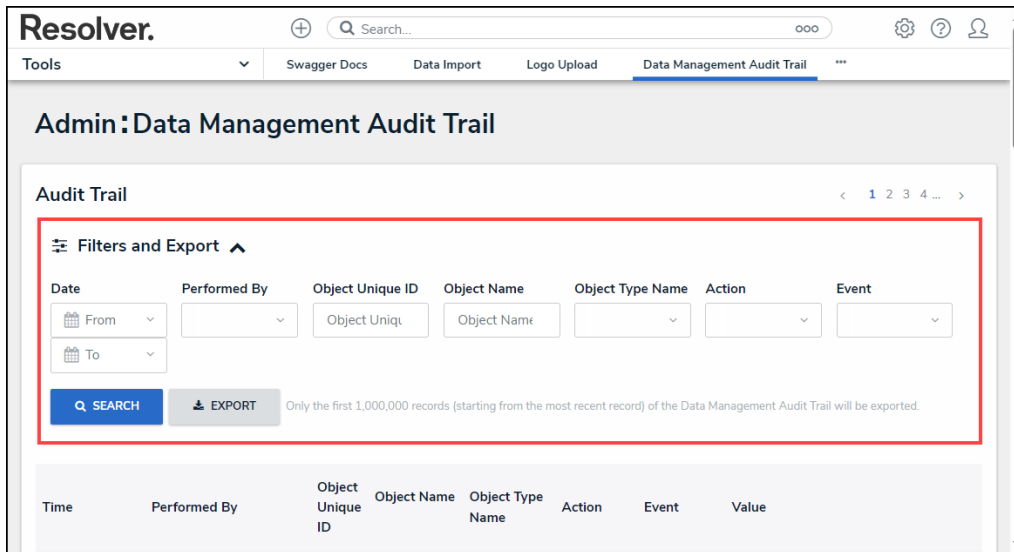

1. From the **Admin: Data Management Audit Trail** screen, click the **Filter and Export** arrow to expand the dropdown menu.

Filter and Export Arrow

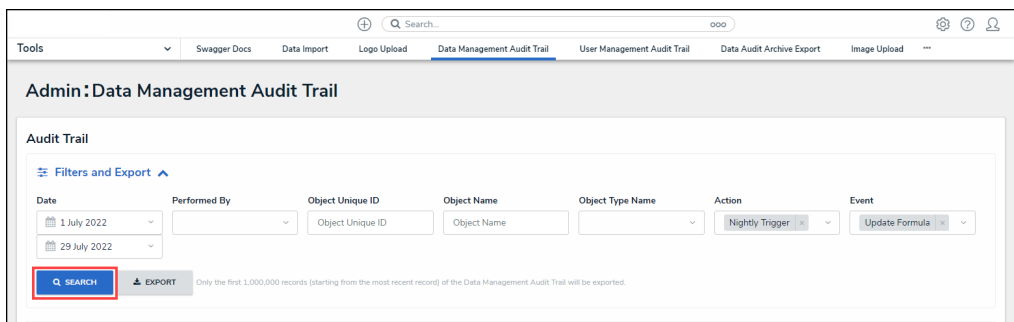

2. Using the **Filter** fields, narrow the Data Management Audit Trail list.
 - o **Date:** Select a date range using the **From** and **To** date fields by clicking a date from the **Calendar** pop-up. The system will return records within the data range specified.

- **Performed By:** Select the User that performed the Action from the dropdown menu.
- **Object Unique ID:** Enter an **Object's Unique ID** in the field.
- **Object Name:** Enter the **Object's Name** in the field.
- **Object Type Name:** Select the **Object Type** from the **Object Type Name** dropdown menu.
- **Action:** An **Action** is a user or system-driven behavior that accesses or applies changes to data.
- **Event:** An **Event** is the result of an action and drives a specific change to the data.

Filter Fields

3. After you have applied search filters, click the **Search** button to return the search results.

Search Button

Note:

A system-generated message will appear if there are more than 1,500 event records. Please use or adjust your filters to narrow down your results.

4. The following information will be returned as part of the search results:

- **Time:** The time the action occurred displayed in local time according to the user's settings.
- **Performed By:** The User who performed the change. A Flag appears next to the value if an Administrator impersonates a user when changes are made. You can see the Administrator impersonating the User by hovering over the Flag.
- **Object Unique ID:** The alpha-numeric ID Resolver automatically assigns to identify an object throughout the Organization.
- **Object Name:** The Object's Name.
- **Object Name Type:** The Object's category type.
- **Action:** The change to the Object initiated by a User or the System (e.g., Nightly Trigger).
- **Event:** The Object's data change that occurred due to the Action (e.g., State Change).
- **Value:** The Value details the changes performed on the Object.

Audit Trail

Filters and Export

Date: 1 July 2022 - 29 July 2022

Performed By: [Dropdown]

Object Unique ID: Object Unique ID

Object Name: Object Name

Object Type Name: [Dropdown]

Action: Nightly Trigger

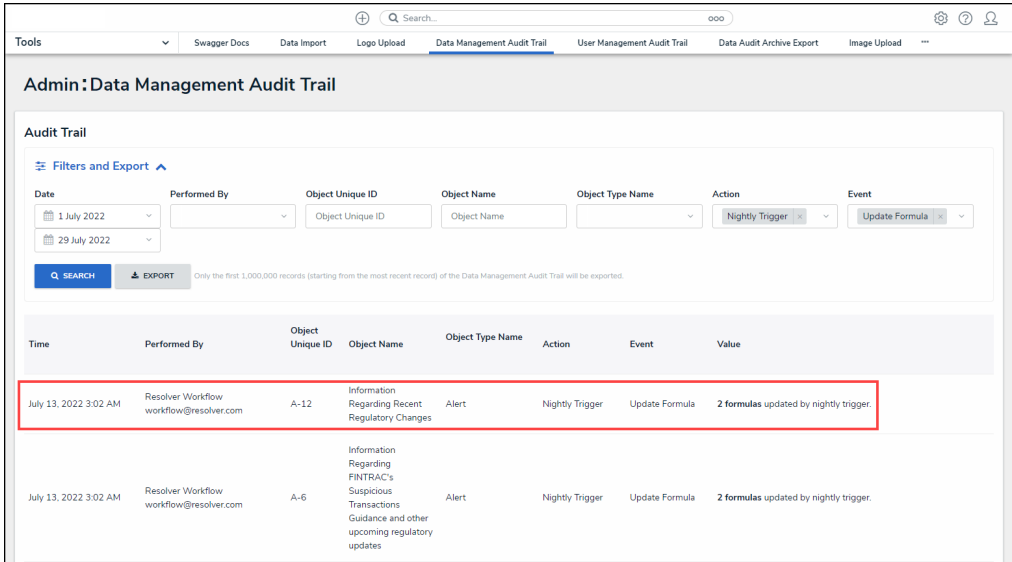

Event: Update Formula

SEARCH EXPORT Only the first 1,000,000 records (starting from the most recent record) of the Data Management Audit Trail will be exported.

Time	Performed By	Object Unique ID	Object Name	Object Type Name	Action	Event	Value
July 13, 2022 3:02 AM	Resolver Workflow workflow@resolver.com	A-12	Information Regarding Recent Regulatory Changes	Alert	Nightly Trigger	Update Formula	2 formulas updated by nightly trigger.
July 13, 2022 3:02 AM	Resolver Workflow workflow@resolver.com	A-6	Information Regarding FINTRAC's Suspicious Transactions Guidance and other upcoming regulatory updates	Alert	Nightly Trigger	Update Formula	2 formulas updated by nightly trigger.

Search Results Section

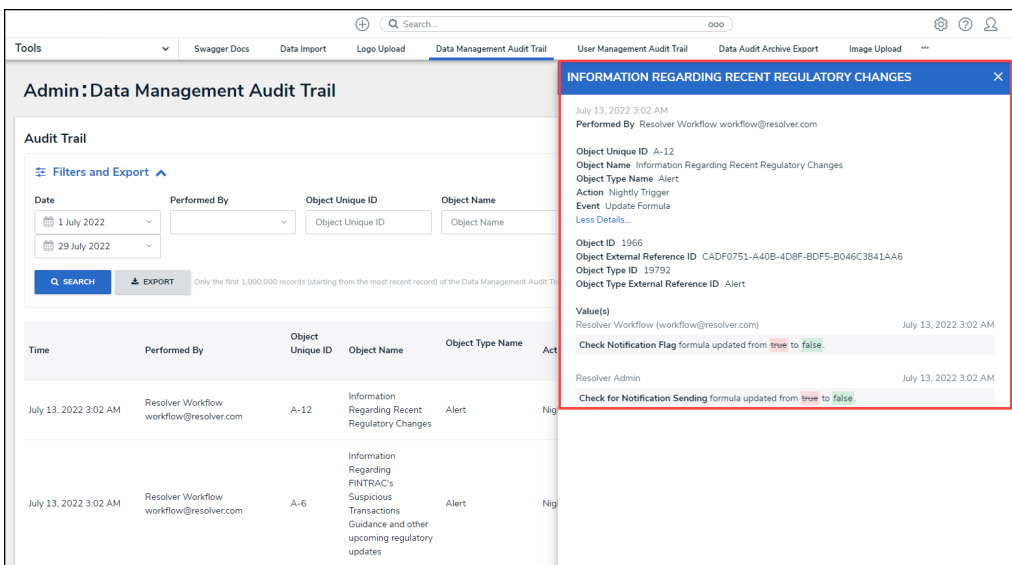

5. Click within a row to open extended Object details.

Object Details Pop-up

6. The following additional information is displayed on the **Object Details** pop-up:

- **Object ID:** The **Object ID** is a numeric ID that the system automatically assigns to an Object when it is created.
- **Object External Reference ID:** The **Object's External Reference ID** is an alpha-numeric ID that identifies the Object throughout the Organization.
- **Object Type ID:** The **Object Type ID** is a numeric ID assigned by a User to identify Object Types throughout the Organization.
- **Object Type External Reference ID:** The **Object Type External Reference** is an alpha-numeric code automatically assigned by the system to identify an Object Type within the Organization.
