

Configure a Standard Form Header

Last Modified on 06/13/2024 11:37 am EDT

Overview

Administrators can configure the following form's header settings:

- Display a Custom Name and a Custom Description.
- Allow end-users to edit the Name or Description properties (provided the appropriate Edit permissions are enabled and the header is not marked as read-only).
- Show the object's **Unique ID** in the header.

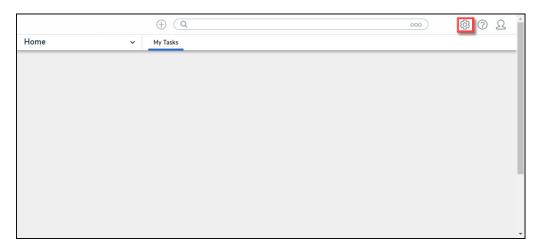

Related Information/Setup

For more information on Form Headers see the Forms Header Overview article.

• Forms Header Overview

Navigation

1. From the *Home* screen, click the **Administration** icon.

Administration Icon

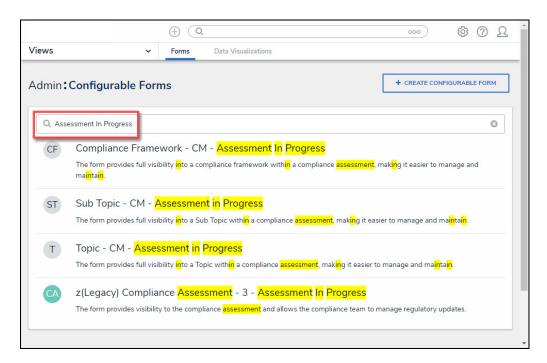

From the *Admin Overview* screen, click the **Configurable Forms** tile on the *Views* section.

	\oplus	Q		000	\$ ® L

Edit Icon

- 2. From the *Edit Header* pop-up, select a Form Title radio button:
 - **Object Name:** The Object's Name property value.
 - (Optional) Read only: The Read only toggle switch will appear when the Object

Name radio button is selected. The toggle marks the form title as read-only, preventing users with **Edit** permissions enabled from modifying the title.

• **Custom Name:** The Object's name-value pulls from the **Form Title** field, which appears below the **Custom Name** radio button.

Workflow Control Enabled

- (Optional) Select Form Features by clicking on the Form Feature Name. A checkmark next to the Form Feature indicates that the Form Feature is active. Form Features modify the available options when viewing a form.
 - Trending & Analysis: The Trending & Analysis tab shows Assessment Results.
 - Manage Assessments: The *Manage Assessments* tab allows you to push object updates syncing the assessment with the library.
 - **Relationship Graph:** The *Relationship Graph* tab shows how that Object is connected to other Objects.
 - History: The History tab tracks all form changes and lists the details.
 - **Emails:** The *Communication* tab is where the email information will appear and tracks all form email correspondence.
 - **Comments:** The *Communication* tab is where the comment information will appear and tracks all form comments.

Form Features Section

- 6. **(Optional)** From the **Assessment Results Table** select list, you can add formulas to be listed as tables, such as:
 - **Residual Risk Score:** Residual Risk Score measures the remaining risk after considering the effects of the controls.
 - **Control Effectiveness:** Control Effectiveness measures effectiveness of the controls used to mitigate a risk.
 - Inherent Risk Score: Inherent Risk Score measure a risk in the absences of controls.
- 7. Click the **Done** button to save your changes.
