

# Version 2.4.2 (Hotfix) Release Notes

Last Modified on 11/20/2018 12:12 pm EST

## Improvements

- Australia (AU) is now a supported region for data storage.
- Added a time limit for formula calculation run times. If the calculation fails after the allotted time, an error message is displayed and an administrator should check the formula's settings to rectify any issues.

## Bug Fixes

- Fixed an issue that prevented users from accessing Core or opening links from emails when SSO is enabled.
- Corrected a problem that prevented some users from creating new objects.
