

Library Application

Last Modified on 07/15/2020 3:28 pm EDT

If you're a member of the [Administrator \(Incident Management\)](#) user group, you will see the **Library** application in your [nav bar](#). Through this application, admins can view and create new objects, including business units, locations, people, organizations, and incident types. These objects are then available to be added to incidents, depending on the user's permissions.

The **Administrator (Incident Management)** user group can view incident objects and create library objects only. It is not to be confused with the [Core Administrator](#), who can add users.

Library items are often updated via spreadsheet import. If you edit a library item, it may revert back if another user is maintaining the item via spreadsheet import. To mass-upload objects by spreadsheet, contact [Resolver Support](#).

The screenshot displays the Resolver application interface. At the top, the Resolver logo is on the left, and a search bar with a plus icon and a search icon is in the center. On the right, there are icons for settings, help, and user profile. Below the header is a navigation bar with tabs: Library (selected), Org Structure, Locations, People, Organizations, Vehicles, Assets, and a menu icon. The main content area is titled "Org Structure" and contains three sections: "Org Structure" with four buttons: "+ CREATE NEW BUSINESS UNIT", "+ CREATE NEW COMPANY", "+ CREATE REGION", and "+ CREATE MARKET"; "Company" with one entry: "C-1 Riverdale Industries" (Active), including a description: "Since its founding in Bavaria in 1872, Riverdale Industries, Inc. has become the leading supplier of fiberboard products in Europe and North America, with offices in 12 cities worldwide, including the U.S. Headquarters in Arlington, VA. This is the only remaining fabricator of wood panel products constructed with hand-ground wood fibers. The company expanded its operations in China in 2006 with the construction of n..."; and "Business Units" with two entries: "BU-1 Business Unit 1" (Active) and "BU-2 Business Unit 2" (Active), both with placeholder text.

The Incident Management Library application.
