Numeric Searches

Last Modified on 12/24/2018 11:11 am EST

- Entering a number's full numeric term will return the exact result. For example, searching for "000000123" will return "000000123".
- If a number is separated by spaces, hyphens, parentheses, or other non-numeric or non-alphabetical characters, searching for a separated portion of that number will return applicable search results. For example, searching for "234" or "8910" will return "1 (234) 567-8910". Likewise, searching for "123" will return "123 456 789".
- Searching for a portion of a number that is **not** separated by non-numeric or non-alphabetical characters will not return any search results. For example, searching for "000000" will not return any search results, but searching for "000000123" will return "000000123".
- If a phrase contains a mix of numbers and words that are separated by spaces, hyphens, parentheses, or any other non-numeric or non-alphabetical characters, searching for a portion of that phrase will return applicable search results. For example, searching for "123" will return "Number 123."
