Administrator Overview

Last Modified on 02/18/2025 2:08 pm EST

Administrators are responsible for adding Compliance Management users and assigning them to user groups. These users do not have access to the app unless they have been added to a user group.
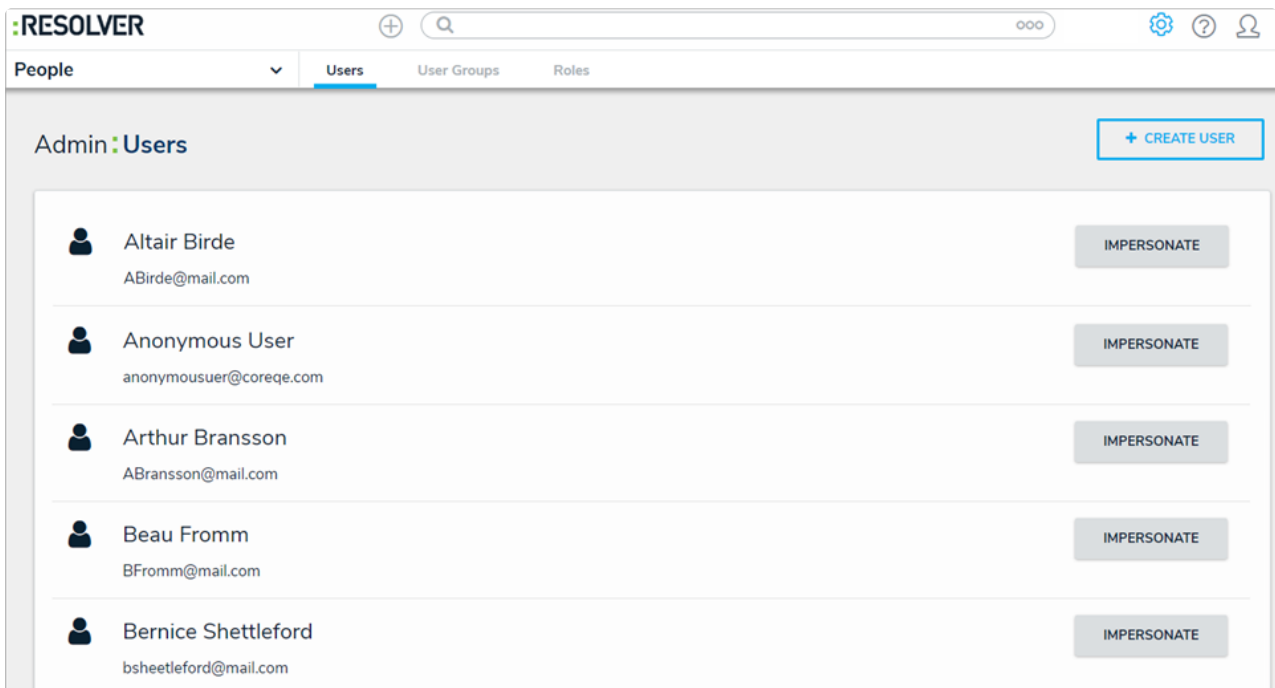

Administrators can access the **Admin** page by clicking the ⚙ icon in the top bar on any page. If you're not an administrator, this icon will not be visible.

⚠️ **Enabling Admin or All Access account status for new users is not recommended. Admin** will give users Administrative privileges, including the ability to cause irreparable damage to your app. **All Access** will give users the ability to see all objects and object types in your app. Users must be added to a user group or they will not have access to the app.

⚠️ As the Administrator, you may be able to edit other settings in Administration. **Deleting or changing administrative settings may cause irreparable damage to your app.** For more information or to request additional configurations to your app's administrative settings, contact Resolver Support.
