

Library Overview

Last Modified on 07/15/2020 3:50 pm EDT

If your organization has purchased [RCM](#), your frameworks are automatically generated and maintained by Resolver. The **Library** contains all of your organization's Regulatory Compliance Management frameworks, regulators, and controls and is visible to users in the **Compliance Team** user group only.

If your organization generates its own frameworks, they'll be imported through a spreadsheet, typically during implementation. For more information on importing frameworks, contact [Resolver Support](#).

Manually editing Library items is **not** recommended. **Deleting items from the Library could cause irreparable damage to your app.**
