

# Regulatory Compliance Framework Overview

Last Modified on 09/01/2020 5:46 pm EDT

RCM is an additional module that can be purchased for your Compliance Management app. RCM provides Regulatory Compliance Management frameworks that can help your organization maintain compliance with the standards and regulations that govern Canadian financial institutions. Resolver does not currently offer compliance management frameworks for other industries or jurisdictions.

For more information which frameworks are available within this module, see the [RCM Framework Subscriptions](#) article.

RCM frameworks are available only if your organization has purchased the RCM module for use with the app. If you have not purchased this module, your organization is responsible for creating and importing its frameworks. Contact [Resolver Support](#) for more information.

## Alerts

Resolver will provide alerts as early as possible once there has been public notice of a change or potential change to the regulatory requirements addressed by our content. Alerts can be triggered by legislation, regulations, and regulatory guidance. They can be accessed by the compliance team in the **Portal** application.
