The Portal in Compliance Management
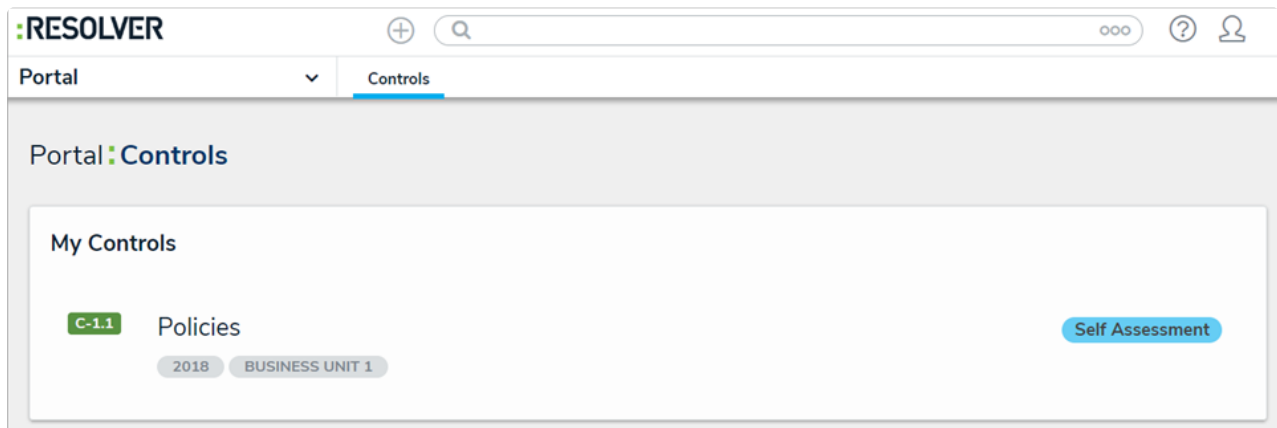

Last Modified on 02/10/2023 11:31 am EST

Users in the Control Owner & Delegate, Issue Owner & Delegate, Requirement Owner & Delegate, Corrective Action Owner & Delegate, and Alert Owner user groups have access to the **Portal** application. Administrators and users in the Compliance Team user group do not have access to the **Portal**, unless they belong to another group that's been provided access.

The **Portal** provides access to the activities relevant to your user group. Any tasks that are assigned to you will appear on the My Tasks page, but they can also be accessed through the **Portal**. The **Portal** contains five activities:

- Requirements: Visible to members of the **Requirement Owner & Delegate** user group.
- Controls: Visible to members of the **Control Owner & Delegate** user group.
- Issues: Visible to members of the **Issue Owner & Delegate** user group.
- Corrective Actions: Visible to members of the **Corrective Action Owner & Delegate** user group.
- Alerts: Visible to members of the **Alert Owner** user group.
- Policies: Visible to members of the **Policy Owners** user group.

If your organization uses other Resolver apps, you may see additional activities in the **Portal**.

The portal as it's displayed to a control owner.
