

Create a Data Grid View

Last Modified on 02/03/2023 10:49 am EST

Overview

A **Data Grid** is a Data Visualization that displays object data in a spreadsheet-style format. Users accessing a Data Grid through an Activity View can sort, filter, edit data, show or hide columns, click through pages, and adjust column width or the number of rows displayed per page.

User Account

The user account you use to log into Resolver must have Administration permissions.

Related Information/Setup

Please refer to the Data Grid Overview article for more information on Data Grid.

View Section

- **Name:** Enter the Name of the Activity View in the **Name** field. The **Name** will appear as a header below the Activity View.
- **(Optional) Description:** Enter a description in the **Description** field, which appears when a user has opened the Activity View. If necessary, apply [Markdown](#) formatting to the text. Click the **Expand** icon beside **Basic Markdown Formatting** to view popular formatting styles.

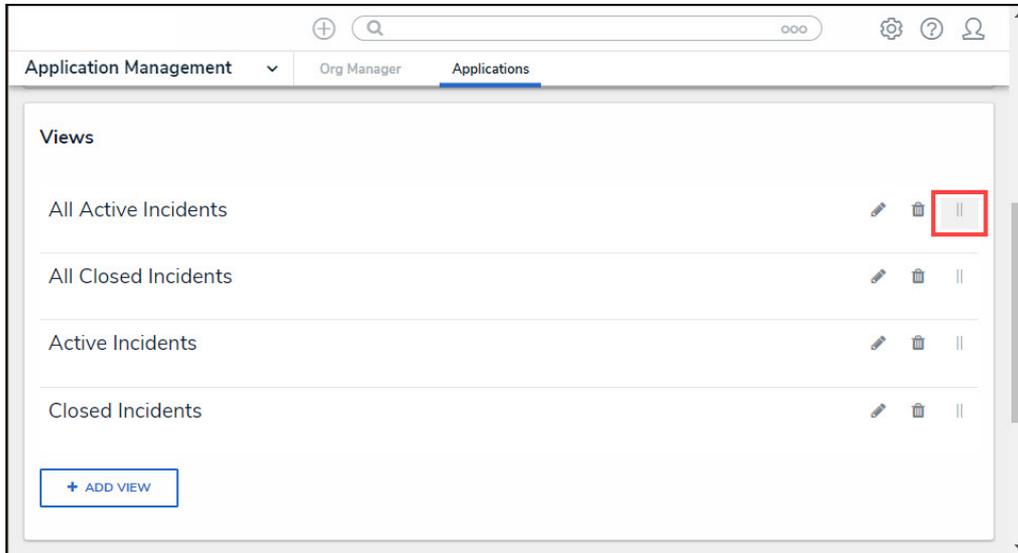

The screenshot displays the configuration page for an Activity View. At the top, there is a navigation bar with 'Application Management' and 'Applications' tabs. Below this, the 'Name' field is a single-line text input. The 'Description' field is a larger multi-line text area. Underneath the description is a section titled 'Basic Markdown Formatting' with a red square icon containing a plus sign, indicating it can be expanded. At the bottom, there is a dropdown menu labeled 'Object Type or Assessment'.

Expand Icon

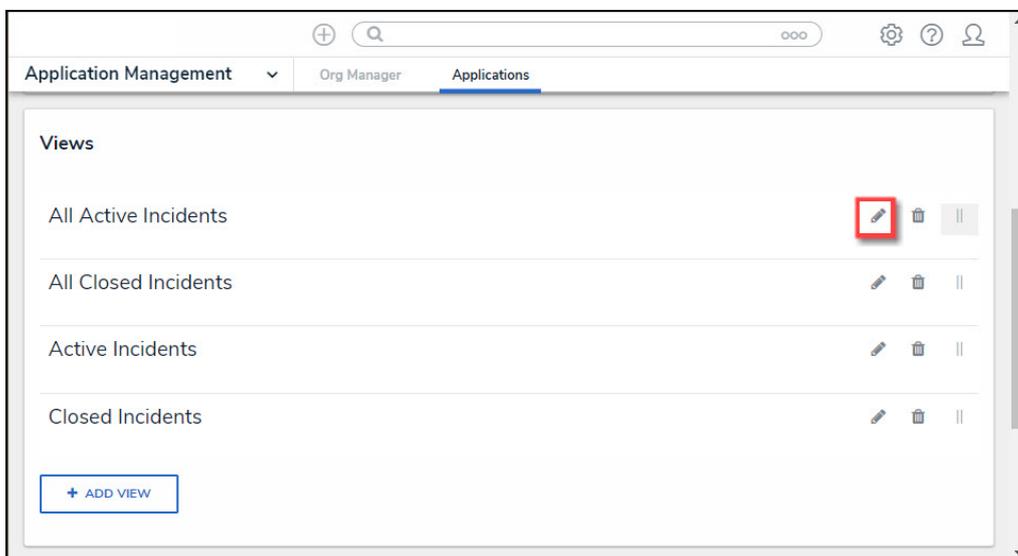

- **Object Type or Assessment:** Select an object type or [assessment](#) from the Object Type or Assessment dropdown menu to specify which Objects will be available in the Activity View.
- **Workflow States:** Select one or more assessment or object type states from the Workflow States dropdown menu to specify which objects or instances will be displayed based on their current states. Workflow State options are based on the option selected in the Object Type or Assessment dropdown.
- **View Action:** Select **Data Grid** from the **View Action** dropdown menu.
- **Define Data Grid to Show:** Select a previously created **Data Grid** from the **Define Data Grid to Show** dropdown menu.
- **Display Options:** Select a Display Option from the **Display Options** dropdown menu:
 - **Show view title when empty:** Shows the Activity View's activity title when the view has no data to display.
 - **Hide view title when empty:** Hides the Activity View's activity title when the view has no data to display.
- **Sorting Options:** Currently, two **Sorting Options** are available for Activity Views within the system, Property and Unique ID. Users can select whether to sort an Activity View by Unique ID Ascending or Descending by selecting a corresponding radio button. By default, the Unique ID Sorting Option is set to Ascending.

2. Click the **Create** button to add the Activity View to the system.
3. Repeat the above steps to add another Activity View to the system.
4. Click the **Reorder** icon, continue to hold the mouse button and drag and drop the Activity View to rearrange the Activity View order.

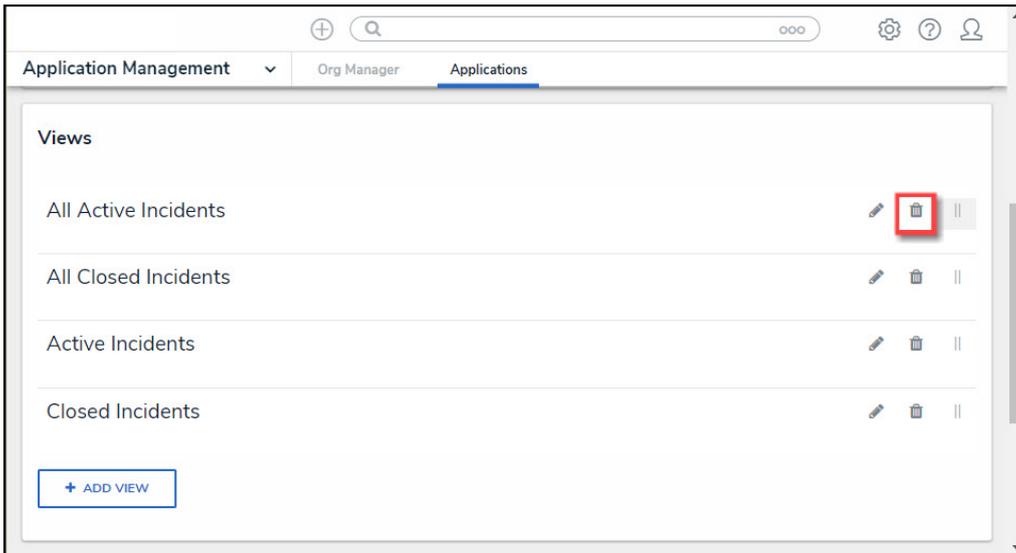

Reorder Icon

5. Click the **Edit** icon to edit an Activity View.

Edit Icon

6. Click the **Delete** icon to delete an Activity View. A **Confirmation** screen will appear. Click on the **Yes** button to delete the Activity View from the system.
