

## Schedule Dispatch

The **Schedule Dispatch** panel allows you to create a [scheduled dispatch](#) and provides a list and calendar view of all upcoming dispatches.

In order to use this feature, the **Dispatch Scheduling Service** must be installed, configured, and activated on the application server.

☒ Contact your IT team to confirm if the service has been implemented. If the service has been correctly implemented, but you're experiencing issues, contact [Resolver Support](#).

This panel can be accessed by clicking  **Schedule** in the ribbon.
