

Vehicle Logs Overview

Last Modified on 10/01/2019 3:04 pm EDT

A **vehicle log** records any vehicles that were involved in a dispatch. Examples of an involved vehicle can include a damaged vehicle, a stolen vehicle, or a vehicle of interest.

The screenshot displays the 'Details - Caissa Fischer' window in the Resolver application. At the top, it shows the call ID 'CF-18' and the date 'Tuesday February 07 2017'. Below this, there are time slots for '7:56 AM', '7:56 AM', and '8:07 AM'. A status bar includes buttons for 'New', 'Unassigned', 'Assigned', 'On Route', 'On Scene', and 'Cleared'. To the right, it lists 'Work Zone: King's Corner', 'Call Entered By: Thoran, Randolph', and 'Dispatcher: Thoran, Randolph'. A search bar for vehicles is visible, with a dropdown menu showing 'ABC 123' with 'Direct Involvement'. A photo of a white car is shown next to the license plate field, which contains 'ABC 123'. The 'Involvement Type' dropdown is set to 'Direct Involvement'. A 'Notes' field contains the text 'Stolen from the parking lot.' The bottom right corner features an 'Auto-Focus' button.

A saved Vehicle Log in the Details panel.
