

Loading & Caching Report Data

To reduce loading times, previously loaded report data, including data refined through end user-applied filters, is cached for up to an hour, preventing the need to regenerate data every time a report is viewed within this 60-minute period.

Reports are reloaded when:

- The 60-minute cache period has expired.
- The report or your browser is refreshed.
- New or additional filters are applied after the report was initially loaded.
- Your session expired or you logged out.
- The browser the report was originally loaded on is closed.
- An administrator changed the configuration of the report (e.g., adding or removing parameters, filters, or object types).
- An administrator has changed the role or permissions that have access to the report.

Caching is not available on data grids.

Banners

When a report is opened, a banner confirming the report data is loading appears at the top of the page, below the [nav bar](#). You can stay on the page until the report is loaded or navigate to another area within your Core organization.

Once the report is successfully loaded, a green confirmation banner is displayed. If you stayed on the report page, the banner is auto-dismissed after 5 seconds. If you navigated away from the page or if you loaded more than one report, the banner is displayed until the **X** in the top-right corner of the banner is clicked. You can access the report and any other cached reports you navigated away from by clicking the ellipsis in the green banner, then clicking the link to open the report page.

The green banner does not display links to cached [starred reports](#) or reports loaded via a [navigation form](#).

The screenshot displays the RESOLVER application interface. At the top left is the RESOLVER logo. To its right is a search bar with a plus icon, a search icon, and a menu icon (three dots). Further right are icons for settings, help, and user profile. Below the header is a navigation bar with tabs: Reports (selected), Enterprise Risk, Incident, Compliance Management, and Data Grid. The main content area is divided into several sections: 1. A banner for 'BU-2 Toronto Office' with an 'Active' status button. 2. A section titled 'Issues by Business Unit'. 3. A section titled 'Loss Events'. 4. A section titled 'Risk and Control Self-Assessment Heat Map' with a search bar. Below this section are four report banners: RA-1: Risk Assessment - London Office (2018 - Q4) with 'RCSA in Progress' status; RA-2: Risk Assessment - London Office (2018 - Q1) with 'RCSA in Progress' status; RA-3: Toronto Q4 2018 Risk Assessment (2018 - Q4) with 'RCSA in Progress' status; RA-4: New Risk Assessment with 'Define Scope of Assessment' button.

Report banners.

Timestamps

Reports display the time and date the report was last updated/loaded based on the current user's local timezone. This timestamp appears on [exported reports](#) and is updated when the report is reloaded or refreshed.

RM - RCSA Risk Heat Map

Last Updated: May 23, 2019 9:37 AM

RA-1 Risk Assessment - London Office

The following report provides an overview of all the risks within the RCSA. It plots each risk by residual impact and residual likelihood within the heat map.

A report timestamp.

Refreshing & Reloading

Cached reports do not refresh automatically to show the most recent data. To show the most recent data, the report must be reloaded by clicking the  icon on the report page or refreshing your browser.
