

# Create Alarm

Last Modified on 10/01/2019 3:00 pm EDT

If a rule has been configured to create a new alarm, the Connect administrator must map (or link) the selected devices to a Dispatch location or indoor location and select an operational zone, work zone, and [template](#).

When a device is mapped, it's marked by either a pin pad icon (for Access Control devices) or camera icon for (Camera devices) on the location or indoor location images, which then appear in the **Map** and **Location** panels in Dispatch. When Connect creates an alarm, the icon for the device that logged the event will flash in the panels, provided the template's [priority](#) has a color associated with it and the **Dispatch Status** is **New**.

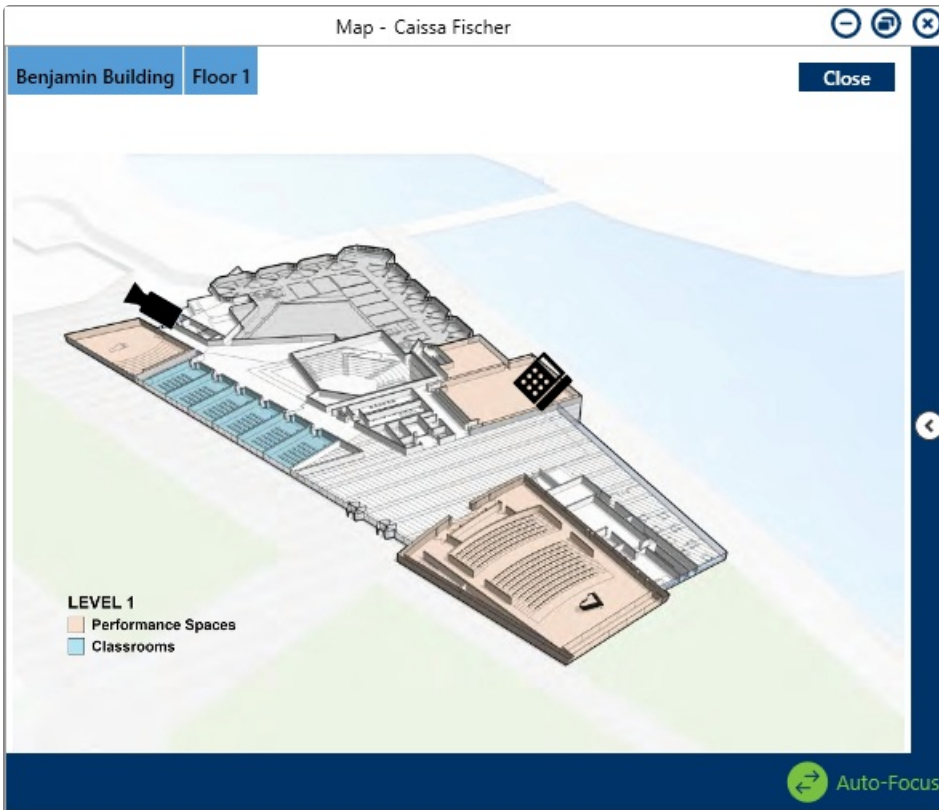

### MAP DEVICES

Device Name	Mapped	
Back Entrance	<input checked="" type="checkbox"/>	MAP
LENEL-3-MIFARE Reader w/PINPad	<input type="checkbox"/>	MAP
Southeast Door	<input checked="" type="checkbox"/>	MAP
