

Important Notes About This Guide

Last Modified on 06/01/2020 5:42 pm EDT

This guide covers how to install and configure the C-Cure connector and its plugin. Before completing the steps in this guide, you must speak to your CSM about installing and configuring Connect and the Dispatch connector.

If you're installing the Lenel connector, see the [Lenel OnGuard Connector Installation Guide](#). For information on editing the connectors, registering and mapping devices, and creating rules, see the [Connect User's Guide](#).
