

Version 2.8.5 Internal Release Notes

Last Modified on 12/04/2019 3:35 pm EST

× This article is for internal use only.

Improvements

- Improved the response time when performing the following GET API calls:
 - data/object/created
 - data/object/updated
 - data/object/deleted
 - data/object/roleMemberships/created
 - data/object/roleMemberships/deleted
- Upgraded to Node 10.
- The SP metadata URL for SSO is now publicly accessible.
- Updated the expiring SP certificate for SSO.

Bug Fixes

- Fixed a bug that caused two individual objects to be assigned the same Unique ID.
- API key access is now updated when Admin privileges are enabled or disabled on a user's profile.
- Corrected an issue that caused 408 errors when uploading files.
