

Include or Exclude Archived Data

Last Modified on 05/06/2025 2:14 pm EDT

Overview

This article provides a brief overview of including or excluding archived data in reports, when searching a relationship or reference field on a form, or when using the **Search** function.

For instructions on archiving objects, see the Archive Data article.

Note: Reports, forms, and roles created before Version 3.0 are configured to **include** archived data by default. All reports, relationship/reference elements, and roles created after Version 3.0 **exclude** archived data by default.

Navigation

1. From the *Home* screen, click the **Administration** icon.

Administration Icon

2. From the Administrator settings menu, click Admin Overview.

Administrator Settings Menu

Including or Excluding Archived Objects from Reports

Note:

The ability to include or exclude archived objects is only for reports and is not supported on other data visualizations (i.e., data grids or analytics export reports).

 From the *Admin Overview* screen, click the **Data Visualization** tile from under the Views section.

5. Click the **Edit** icon when finished.

Including or Excluding Archived Objects from Relationship and Reference Form Elements

When archived data is included on relationship or reference elements with the search option enabled, users can search for, select, and/or view archived objects through those element(s) on a standard configurable form.

 From the *Admin Overview* screen, click the **Configurable Forms** tile from under the Views section.

		(D Q Search				\$ @ L

	o Fields	Assessments	Data Definitions				

Configurable Forms Tile

- 2. From the *Admin: Configurable Forms* screen, create a new standard form or open an existing one to view the *Admin: Edit Configurable Form* screen.
- 3. If required, add a relationship or reference element to the canvas.
- 4. Hover your cursor over the relationship or reference element and click the **Edit** icon.

7. Click the **Close** button when finished.

Including or Excluding Archived Objects from Search

Enabling **Archived Search** on a role allows users to enable the **Include Archived Data** option when searching the organization for objects. Note that if a user is in multiple roles and **Archive Search** is disabled on one role, but not the other, the user may still be able to perform a search of archived objects or vice versa.

1. From the *Admin: Overview* screen, click the **Roles** tile from under the **Views** section.

4. Click **Done** when finished.

Including or Excluding Archived Objects from Navigation Forms

Users can now choose whether to include archived data in the nav tree of navigation forms.

All existing navigation forms will have this feature enabled, and Administrators will need to uncheck the box to not display archived data in navigation forms. New forms will have the feature disabled by default.

 From the *Admin: Overview* screen, click the **Configurable Forms** tile from under the Views section.
