

Version 1.3.2 Release Notes

Last Modified on 08/10/2020 6:21 pm EDT

New Features

Resolver Knowledge Base

Core help can now be accessed through the all-new Resolver Knowledge Base. Explore topics by category, by popular, new, or recently updated articles, or by entering search terms. The Knowledge Base can be accessed any time you're logged into Core by clicking the  icon in the left navigation menu.

The screenshot shows the Resolver Knowledge Base interface. At the top, there is a navigation bar with the Resolver logo and links for Home, Articles, Support, and Logout. Below the navigation bar is a large image of a tablet displaying a dashboard with various charts and graphs. A search bar is overlaid on the image with the text "Have a question? Get started with search." Below the image, there are three columns of article categories, each with an icon and a list of article titles.

Popular Articles	New Articles	Updated Articles
Important Notes About This Guide	Add a New Language	Add a New Language
System Requirements	Add a Bar Chart or Column Chart	Add a Bar Chart or Column Chart
Create an Assessment Object	Comments	Add a Heat Map
Add a View to an Activity	Edit a Data Definition or Review the Data Path	Add a Pie Chart or Half-Pie Chart to a Report

Anonymous Login

The new Anonymous Login feature allows administrators to use a single account to grant multiple users limited access to Core. Once an account for this purpose is created, administrators select that account and generate a URL that can be shared with users as needed. Users with this URL don't need to provide login information and can only view the form/activity selected in the settings. This feature is useful for organizations that occasionally require non-employees or ground-level employees to access Core and/or anonymously create or edit data.
