

Version 3.0.3 (Hotfix) Release Notes

Last Modified on 08/10/2020 6:19 pm EDT

Bug Fixes & Improvements

- The # symbol can now be included in search terms.
- Formula calculations triggered by workflow orchestrations have been improved.
- Fixed an issue that prevented users from being redirected to the Change Password page when their password expired.
- The Web Application Firewall now only blocks full SQL statements, rather than any instance of SQL keywords.
