The Portal in Risk Management
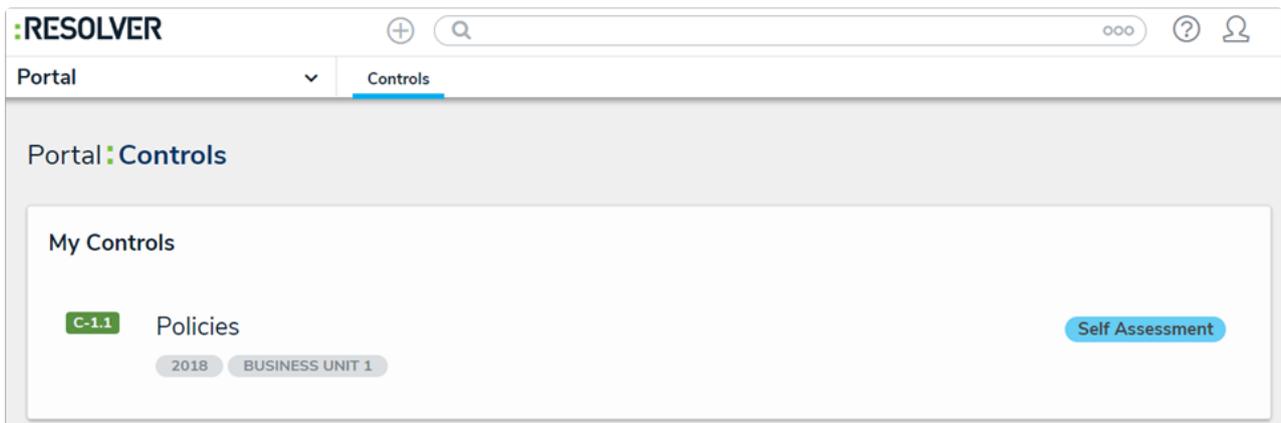

Last Modified on 04/05/2023 5:13 pm EDT

Users in the Risk Owner, Control Owner, Issue Owner, Corrective Action Owner, Indicator Owner, Loss Event Owner, and Risk Limited Users user groups have access to the **Portal** application. Administrators and users in the Risk Team user group do not have access to the **Portal**, unless they belong to another group that's been provided access.

The **Portal** provides access to the activities relevant to your user group. Any tasks that are assigned to you will appear on the My Tasks page, but they can also be accessed through the **Portal**. The **Portal** contains five activities:

- Risks: Visible to members of the **Risk Owner & Delegate** and **Risk Limited User** user groups.
- Controls: Visible to members of the **Control Owner & Delegate** and **Risk Limited User** user groups.
- Issues: Visible to members of the **Issue Owner & Delegate** and **Risk Limited User** user groups.
- Corrective Actions: Visible to members of the **Corrective Action Owner & Delegate** and **Risk Limited User** user groups.
- Key Risk Indicators (KRIs): Visible to members of the **Indicator Owner & Delegate** and **Risk Limited User** user groups.
- Loss Events: Visible to members of the **Loss Event Owner** and **Risk Limited User** user groups.
- Policies: Visible to members of the **Policy Owners** and **Risk Limited User** user groups.

If your organization uses other Resolver apps, you may see additional activities in the **Portal**.

The portal as it's displayed to a control owner.
