

Risk Owner & Delegate Overview

Last Modified on 04/05/2023 5:13 pm EDT

During the risk assessment process, the [Risk Team](#) assigns risks to users in the **Risk Owner & Delegate** user group. Users in this group are responsible for:

- Assessing risks and documenting the controls the organization has in place;
- Reviewing the issues and corrective actions for their assigned risks ; and
- Ensuring that key metrics such as KRI, incident, and loss event data, are up-to-date for their assigned risks.

Risk owners and their delegates have access to the [Portal](#) application only, unless they are assigned to additional user groups or have access to other Resolver apps.

The screenshot shows the Resolver application interface for a user in the Risk Owner user group. The top navigation bar includes the Resolver logo, a search bar, and icons for settings, help, and user profile. Below the navigation bar, there are tabs for 'Portal', 'Risks', and 'Loss Events'. The main content area is titled 'Risks' and contains three sections: 1. 'Risks' overview with a '+ CREATE RISK' button. 2. 'My Risk Management Dashboard' showing a risk entry for 'Riverdale Industries' with a 'C-1' severity and an 'Active' status. 3. 'My Risk Report' showing the same risk entry for 'Riverdale Industries' with a 'C-1' severity and an 'Active' status.

The Portal as it's displayed to a user in the Risk Owner user group.
