

## Create New Library Objects

Members of the **Risk Team** user group can use the **Library** application to create new objects, including objectives, risks, controls, and more. These objects are then available to be added to new risk assessments.

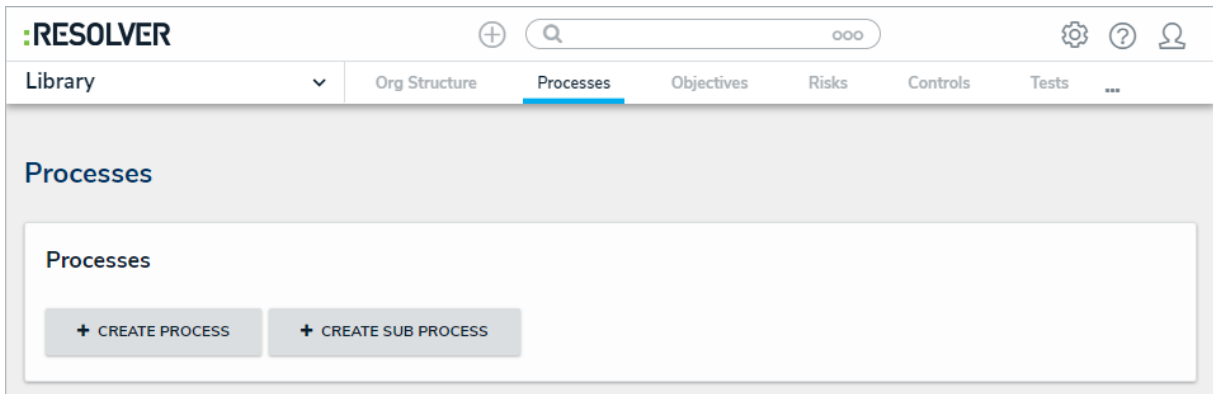

### To create new Library objects:

1. Log into a user account that's been added to the **Risk Team** user group.
2. Click the dropdown in the nav bar > **Library**.

*The nav bar.*

3. Click the tab that corresponds to the type of object you want to create, such as **Processes**, **Objectives**, or **Risks**.
4. Click the applicable button at the top of the page to add an object.

*The button for creating a new Risk Management object.*

5. Complete the fields as required. The available fields will vary depending on the object type being created.

The screenshot shows the RESOLVER application interface. At the top left is the RESOLVER logo. To its right is a search bar with a magnifying glass icon and a plus sign. Further right are icons for settings, help, and user profile. Below this is a navigation bar with tabs: Library (selected), Org Structure, Processes, Objectives, Risks, Controls, and Tests. The main content area has a blue header bar that says 'Process Status: Creation'. Below this is the title 'Create a New Process' and a yellow tag 'P-XXX'. The form contains two input fields: 'Process Name' (a single-line text box) and 'Description' (a multi-line text area). At the bottom center is a blue 'CREATE' button, and at the bottom right is a 'CANCEL' link.

*Creating a new Risk Management object.*

6. Click Create.
