

Loss Event Owners Overview

Loss event owners are responsible for submitting loss events to be triaged, determining the events' losses and recoveries, analyzing the root cause of the event, linking events to corrective actions, and submitting the events to the **Risk Team** for review. If need be, loss event owners can link events to risks they have been granted access to. Loss event owners are assigned by the [Risk Team](#).

Assigned events appear on the [My Tasks](#) page.

The screenshot displays the RESOLVER interface. At the top, there is a navigation bar with the RESOLVER logo, a search bar, and utility icons (gear, question mark, user profile). Below the navigation bar, the 'Home' menu is expanded to show 'My Tasks'. The main content area is divided into two panels. The left panel, titled 'My Tasks', contains a list of five assigned loss events, each with a unique ID, a description, an assignment date, and an 'OPEN' button. The right panel, titled 'Loss Event Workflow State', features a horizontal bar chart showing the number of open events, with a value of 5 indicated on the x-axis.

Loss Event ID	Description	Assigned Date	Status
