

Create a Session Token

Last Modified on 02/26/2021 5:04 pm EST

To create a session token:

- 1. Log into Core as an administrator.
- 2. Navigate to Admin > Swagger Docs.
- 3. Click any endpoint to launch Swagger.
- 4. Scroll down to the authenticate endpoint to expand it.
- 5. Click **POST /user/authenticate**.
- 6. Click the **Example Value** box to populate the template in the **body** text box, then enter your login credentials and the org ID in the request body. Org IDs can be obtained using
- 7. Click **Try it out!** to return one of the following responses:
 - **401 Unauthorized:** The login credentials are incorrect.
 - 404 Not Found: The user is not an active member of any orgs.
 - 200 Success: The user was successfully authenticated.
- 8. If successful, copy the bearer token to your clipboard. This token is valid for 15 minutes and must be entered in the authorization header of each request.
