Version 3.1.1

Bug Fixes

- Fixed an issue with too many lines in a text field causing blank pages in PDF exports.
- Fixed an issue with workflow transitions showing an error when trying to assign the current user to a role.

Improvements

- Made improvements to assessment scoping to help prevent timeouts as assessments grow in size.
- Anonymous portals are now more efficient at handling high latency network connections.
- More time has been allotted to data imports to allow imports with attachments to complete successfully.
