Renew a Session Token

Last Modified on 02/26/2021 5:04 pm EST

To maintain the current session:

1. From Swagger, scroll down to the **authenticate** endpoint.

2. Click **GET /user/authenticate (Renew token)**.

3. Enter the bearer token that's about to expire in the authorization header.

4. Click **Try it out!** to return a new token, which is valid for 15 minutes.

5. Copy the new token to your clipboard and use it for any subsequent calls.
