

Library Application in Security Risk Management

Last Modified on 05/09/2022 2:45 pm EDT

If you're a member of the **Administrator (Incident Management)** user group, the **Library** application will display in your **nav bar**. Through this application, admins can view and create new objects, including business units, locations, organizations, and incident types. These objects are then available to be added to incidents, depending on the user's permissions.

Library items are often updated via spreadsheet import. If you edit a library item, it may revert back if another user is maintaining the item via spreadsheet import. To mass-upload objects by spreadsheet, contact [Resolver Support](#).

The screenshot displays the Resolver application interface. At the top, the 'RESOLVER' logo is on the left, and a search bar with a magnifying glass icon and a dropdown menu with three dots is on the right. Below the logo is a navigation bar with tabs: 'Library', 'Org Structure', 'Locations', 'People', 'Organizations', 'Vehicles', and 'Assets'. The 'Org Structure' tab is selected and highlighted in blue. The main content area is titled 'Org Structure' and contains three sections: 1. 'Org Structure' with four buttons: '+ CREATE NEW BUSINESS UNIT', '+ CREATE NEW COMPANY', '+ CREATE REGION', and '+ CREATE MARKET'. 2. 'Company' section featuring 'C-1 Riverdale Industries' with a description and an 'Active' status button. 3. 'Business Units' section featuring 'BU-1 Business Unit 1' and 'BU-2 Business Unit 2', each with a description and an 'Active' status button.

The Incident Management Library application.
