

# Delete a Launched Assessment Object

Last Modified on 04/20/2021 12:05 pm EDT

Deleting an assessment object will delete the individual object, together with any [instances](#) and links to [reference](#) data. To delete an assessment object, you must have:

- Administrative privileges enabled on your [user account](#); and
- The assessment type added to your [role](#) with [Delete](#) permissions enabled for all states for the assessment type and object types included in the assessment **OR** [All Access](#) enabled on your user account.

Deleting an assessment object will **not** delete the assessment type. To delete a launched assessment type and all its objects and instances, see the [Delete a Launched Assessment](#) article. To delete an assessment that has not yet been launched, see [Edit or Delete an Assessment](#).

## To delete an assessment object:

1. Open the assessment object by navigating to it in a [view](#) or using the [search](#) tool.
2. Click the ellipses icon at the top-right of the form, then click **Delete**.

*The ellipses icon on the Assessment object form.*

3. On the **Confirm Delete** screen, review and type in the number of objects to be deleted to confirm their deletion.

[Referenced objects](#) mapped to the assessment are **not** deleted.
