Configure the Submitter Column in a Relationship or Report Table

Last Modified on 02/10/2023 11:20 am EST

Report Tables Overview

When editing a Relationship Table element's component display, the Submitter property displays in the properties and fields list to be included as columns. The end user will see a Submitter column on the form.

If the user is not confidential, the field displays Name and/or Email (based on the input into the form property). If both are present it displays as name, email. However, if there was no contact value input, nothing would be displayed.

If the user is confidential, the field will display the word Confidential. However, if there was no contact value input, nothing would be displayed in the field.

To configure the Submitter property column in a Relationship Table:

1. In the relevant Relationship table, click the pencil icon on the top right to open the **Edit Component Display** popup.

2. Scroll to **View Relationship as**, which displays these options:
   - Dropdown
   - Table
   - Map

3. Scroll to the **Build the Relationship Table** select list, then select the Submitter property to add that column to your Relationship table.

Edit Component Display

○ Dropdown

✔ Table

○ Map

Build the Relationship Table

Select the Properties and Fields to include as columns.

External Reference Id		
Location		
✔ Submitter		
Organizational Driver	FIELD	INCIDENT TYPE
Incident Subcategory	FIELD	INCIDENT TYPE
Investigation	FIELD	INCIDENT TYPE

CLOSE

The Build the Relationship Table select list.

To configure the Submitter property column in a Report Table:

1. In the relevant Report Canvas, click the pencil icon on the top right to open the **Edit Table** palette.

2. Scroll to the **Select Data** list and select the Submitter property to add that column to your Report table.
   - If the user entered contact info, it displays in the Submitter property column.
   - If the user chooses to remain confidential it displays as such.
