

# Form Cards Overview

Last Modified on 04/19/2022 11:02 am EDT

As described in the [Form Layouts Overview](#) article, you can organize a [standard form](#) layout by using 1 Column, or by using a Left Sidebar/Right Sidebar card. But these sidebar layout options aren't the only way cards are used on forms in Resolver Core!

A form card refers to a primary group of content within a standard form canvas – either in the [Sidebar Card](#), or within the main form area. Administrators can add multiple form cards to the main form area, to help to clearly separate form content. Then you may also add form sections, which function as secondary content groups within unique form cards.

## Risk Assessment Details

Define what risk categories and risks are relevant to the business and monitor them throughout the assessment.

### Risk Assessment Name

### Business Unit

## Define & Review Assessment Scope

View risk categories that are in scope for the assessment. To add a new risk category to the assessment, you must first navigate to the library to create the risk category.

### Risk Category

Unique ID	Name
RC-5.1	Financial
RC-4.1	Information Technology
RC-3.1	Legal / Compliance
RC-2.1	Operational
RC-1.1	Strategic

[ADD EXISTING RISK CATEGORY](#)

*Form cards.*

By using form cards, admins can display the form data into more distinct, visually appealing content groups than if they used form sections alone. However, [form sections](#) help to “chunk”

content within form cards. When working with form sections, it is often best to use titles and keep the section expanded. So, instead of adding collapsible sections, consider using form cards that include form sections.

The screenshot shows a software interface with a top navigation bar containing tabs: 'Inherent Risk', 'Control Effectiveness' (selected), 'Residual Risk', 'Risk Treatment', and 'Historical Trending'. Below this, there's a 'Control Effectiveness' section with a dropdown menu set to 'Medium'. A note below reads: 'Medium: Control is not consistently effective'. Below that is another set of tabs: 'Issues', 'Controls' (selected), and 'Historical Trending'. A paragraph of text explains how to document controls. Below this is a table titled 'Controls' with columns: 'Unique ID', 'Name', 'Description', 'Control Self Assessment', and 'Workflow State'. The table contains three rows of control data. At the bottom of the table is a link: 'ADD EXISTING CONTROLS'.

Unique ID	Name	Description	Control Self Assessment	Workflow State
C-74.3	System borrowing limits	System borrowing limits	Medium	Assign Control Owner
C-60.2	Travel and entertainment expenses are audited or reviewed on a sample basis.	Travel and entertainment expenses are audited or reviewed on a sample basis.	Medium	Assign Control Owner
C-52.1	Establish and distribute a standard operating and procedures manual	Establish and distribute a standard operating and procedures manual to document specific procedures.	Medium	Assign Control Owner

Card tabs and section tabs.

Forms can have tabs on both the card and section levels. Card-level tabs reduce the need for form scrolling, as they allow the admin to place content horizontally within the card. For example, forms like Incident Triage, Risk Assessment, and Control Assessment have many sections with a lot of content to manage in them. So those form type layouts would benefit from using form cards with card-level tabs.

The screenshot shows a software interface with a left sidebar containing several form sections: 'Corporate', 'Primary Incident Type' (Security Breach), 'Location' (with a search box), 'Incident Start DateTime' (June 17, 2019 8:00 pm), 'Incident End DateTime', 'Incident Reported DateTime' (June 17, 2019 8:00 pm), and 'Closed Date/Time'. The main content area is divided into two sections, 'Location' and 'Persons', both highlighted with green boxes. The 'Location' section contains a table with columns: 'Location', 'Primary Location', 'Location Reason', and 'Location'. The 'Persons' section contains a table with columns: 'Name', 'Person Involvement Type', 'Involvement Flags', 'Description', 'Is Employee', and 'Linked to Master'. A search box is present above the 'Persons' table.

Location	Primary Location	Location Reason	Location
	No	Reported Location	Headquarters - Riverdale Industries
	No	Reported Location	Headquarters - Riverdale Industries
123 Fake Hollow Rd, York, PA 17406, United States	Yes	Related Activity Location	

Name	Person Involvement Type	Involvement Flags	Description	Is Employee	Linked to Master
Jose Perez	Person of Interest			No	Person
Test Person	Person of Interest			No	Person
Alexis Medina	Witness			Yes	Person

Form sections in a card.

Functionally, card tabs work the same as [section tabs](#):

- They can be reordered between each other.
- They can adapt to existing conditional logic.
- Each card can be expanded or collapsed.
