

Version 22.1 Release Notes (Internal Controls)

Last Modified on 05/20/2022 4:17 pm EDT

New Features

Internal Controls (IC) Form UI Enhancements

With the 22.1 application release, we've updated our form layouts for the following IC Management forms:

- Issue
- Corrective Action

These form UI enhancements were made to improve your screen utilization and to avoid you doing deep scrolls, collapsing, or expanding sections in larger forms. The IC form layout changes include:

- Upper-level Tabs
- Form Layout Options
- Separate Card Sections
- New Headers
- Workflow State Controls or Buttons

Read more about our Forms Transformation in the [22.1 platform release notes](#).

End of Internet Explorer Support

Effective with the 22.1 release, Core will be ending support for Internet Explorer 11 - meaning you can no longer access the system by using IE. If you are currently using Internet Explorer 11, you must switch to another [supported browser](#).

Read more [here](#) about Internet Explorer becoming an End of Life (EOL) software.

Note: Some new release features may not be added to your software version by default. To enable a particular one within your org, please contact your CSM for more information.
