

# Trends and Analysis Tab Overview

Last Modified on 12/11/2024 2:45 pm EST

## Overview

The ***Trending and Analysis*** tab can be enabled on standard form headers and appears at the top of the form. The ***Trending and Analysis*** tab allows you to:

- View Assessment results.
- See the Assessments that are connected to an Object.

---

## User Account Requirements

The user account you use to log into Resolver will need access to the ***Trending and Analysis*** tab.

---

## Related Information/Setup

You can enable/disable the ***Trending and Analysis*** tab on individual form templates. For more information on how to activate the ***Trending and Analysis*** tab, please review the **Configure a Standard Form** article:

- [Configure a Standard Form](#)

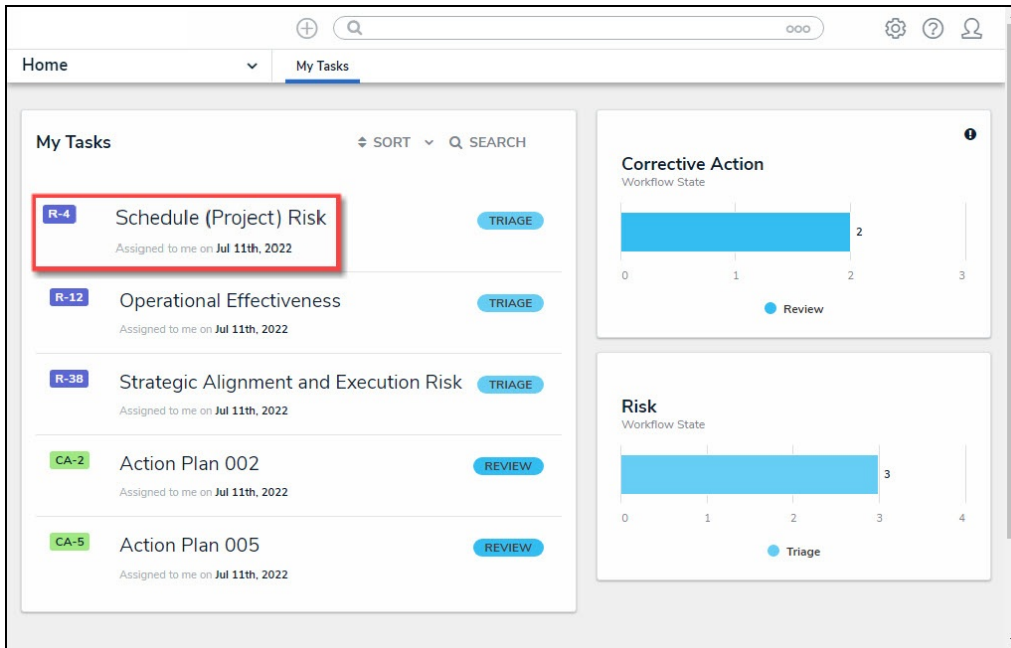

The **Push Object Changes** feature allows users to push Object Changes (e.g., Risk name change) to all linked Assessment Objects and Library Objects. For more information on the **Push Object Changes** feature, please review the **Push Object Changers** article:

- [Push Object Changes](#)

---

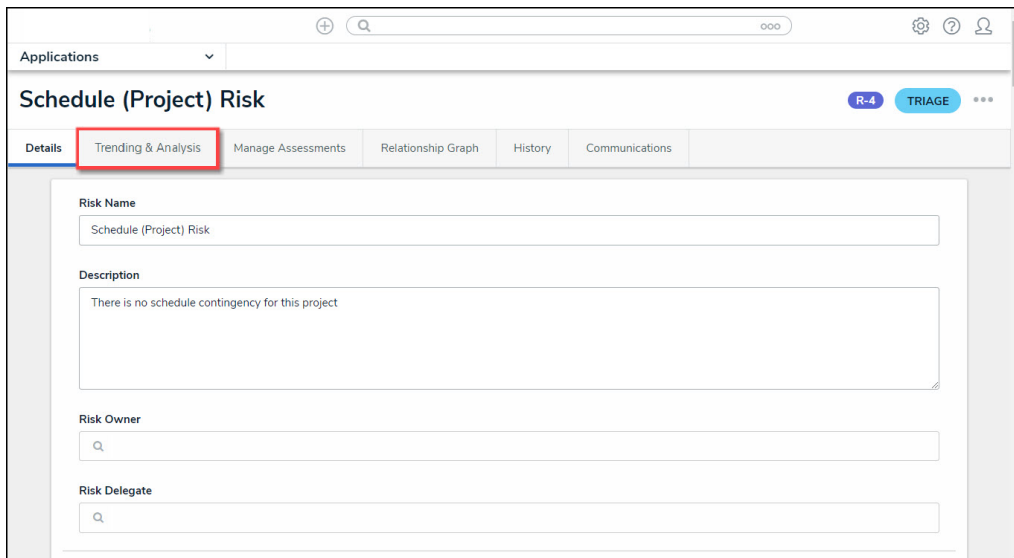

## Navigation

1. From the **Home** screen, select a **Task** from the **My Tasks** list.

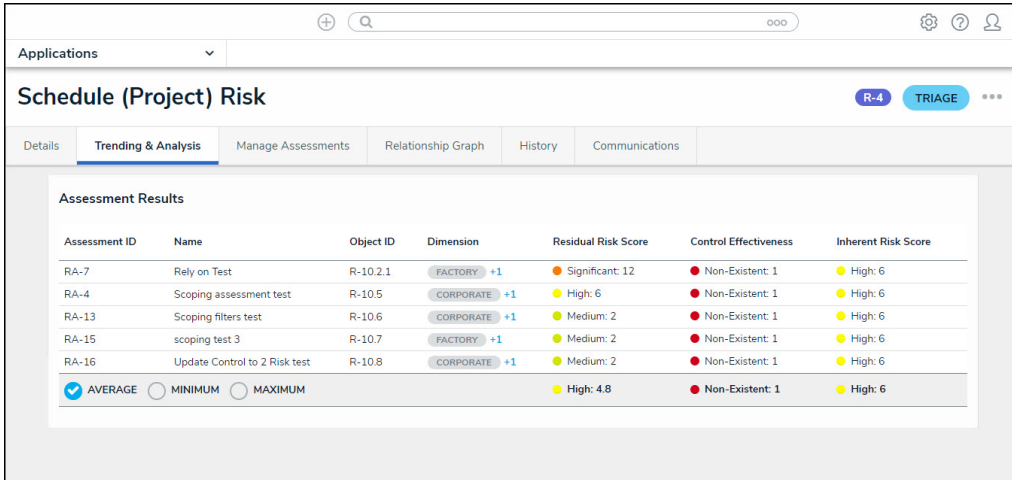

*My Tasks List*

2. From the **Form** screen, click on the **Trending and Analysis** tab.

*Trending and Analysis Tab*

3. The **Trending and Analysis** tab will appear.

*Trending and Analysis Tab*

## Assessment Results

The **Assessment Results** table displays average scores and formulas on a single cloned object across all Assessments. Users can also view minimum and maximum results by clicking the corresponding radio button.

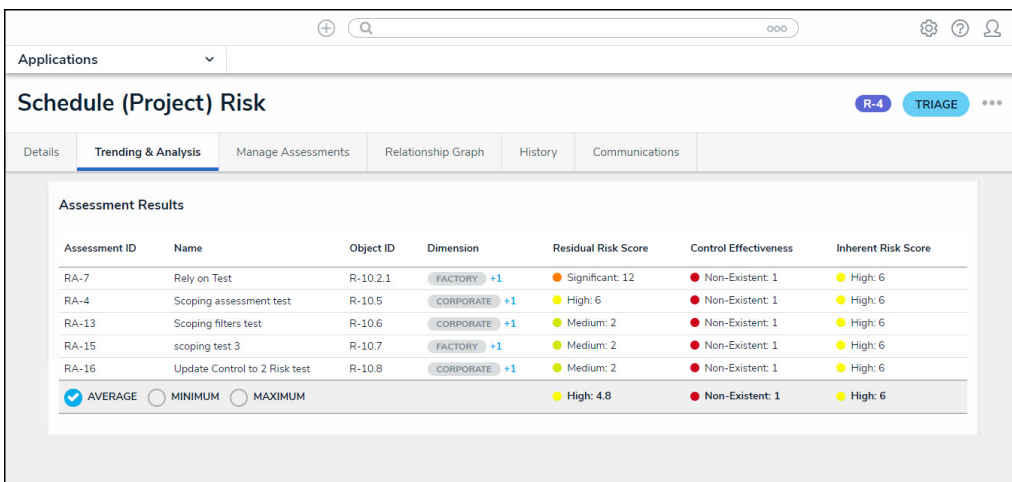

### Example

- A Risk Team user can review the Assessment results on a risk, allowing them to understand the risk exposure for their organization.

Additional fields can be included in the Assessment Results by [editing the Header Section](#) on the form. The fields available are based on the object Type (e.g., Control, Risk, etc.).

The following radio buttons will appear on the **Assessments Results** table:

- **Average:** The **Average** radio button calculates the average score of all formula variables in a table column (e.g., Residual Risk).

*Average Radio Button*

- **Minimum:** The **Minimum** radio button calculates the minimum score of all formula variables in a table column (e.g., Residual Risk).

The screenshot shows the 'Schedule (Project) Risk' interface. At the top, there are navigation tabs: 'Details', 'Trending & Analysis' (selected), 'Manage Assessments', 'Relationship Graph', 'History', and 'Communications'. Below the tabs is a table titled 'Assessment Results' with the following columns: 'Assessment ID', 'Name', 'Object ID', 'Dimension', 'Residual Risk Score', 'Control Effectiveness', and 'Inherent Risk Score'. The table contains six rows of data. At the bottom of the table, there are three radio buttons: 'AVERAGE', 'MINIMUM' (which is selected), and 'MAXIMUM'. The 'Residual Risk Score' column shows values like 'Significant: 12', 'High: 6', 'Medium: 2', and 'Non-Existent: 1'.

Assessment ID	Name	Object ID	Dimension	Residual Risk Score	Control Effectiveness	Inherent Risk Score
RA-7	Rely on Test	R-10.2.1	FACTORY +1	Significant: 12	Non-Existent: 1	High: 6
RA-4	Scoping assessment test	R-10.5	CORPORATE +1	High: 6	Non-Existent: 1	High: 6
RA-13	Scoping filters test	R-10.6	CORPORATE +1	Medium: 2	Non-Existent: 1	High: 6
RA-15	scoping test 3	R-10.7	FACTORY +1	Medium: 2	Non-Existent: 1	High: 6
RA-16	Update Control to 2 Risk test	R-10.8	CORPORATE +1	Medium: 2	Non-Existent: 1	High: 6
				Medium: 2	Non-Existent: 1	High: 6

*Minimum Radio Button*

- **Maximum:** The **Maximum** radio button calculates the maximum score of all formula variables in a table column (e.g., Residual Risk).

The screenshot shows the 'Schedule (Project) Risk' interface, similar to the previous one. The 'Trending & Analysis' tab is still selected. In this screenshot, the 'MAXIMUM' radio button is selected at the bottom of the table. The 'Residual Risk Score' column now shows 'Significant: 12' for the first row, indicating that the maximum value from the previous rows is being displayed.

Assessment ID	Name	Object ID	Dimension	Residual Risk Score	Control Effectiveness	Inherent Risk Score
RA-7	Rely on Test	R-10.2.1	FACTORY +1	Significant: 12	Non-Existent: 1	High: 6
RA-4	Scoping assessment test	R-10.5	CORPORATE +1	High: 6	Non-Existent: 1	High: 6
RA-13	Scoping filters test	R-10.6	CORPORATE +1	Medium: 2	Non-Existent: 1	High: 6
RA-15	scoping test 3	R-10.7	FACTORY +1	Medium: 2	Non-Existent: 1	High: 6
RA-16	Update Control to 2 Risk test	R-10.8	CORPORATE +1	Medium: 2	Non-Existent: 1	High: 6
				Significant: 12	Non-Existent: 1	High: 6

*Maximum Radio Button*

**Note:**

Only Objects are used to calculate the Average, Minimum, and Maximum column scores.
