

Create a New User

Last Modified on 04/04/2023 4:24 pm EDT

Overview

Every individual you want to access your Resolver environment requires a user account. A user with Administrator privileges can add user accounts to Resolver. When a user account is created, an Administrator must assign each user-to-user groups for the user to access the Resolver environment. Only Administrators can add users to the system.

User Account Requirements

The user account you use to log into Resolver must have Administrator or advanced permissions to access the **User Management** screen.

Related Information/Setup

For more information regarding Administrative user privileges, please see the [Administrator Overview](#) article.

For more information on adding a user to a user group, please see the [Adding a User to a User Group](#) article.

For more information on using an alternate language setting, please see the [Languages Overview](#) article.

For Orgs that have Data Warehouse enabled, please see the [Access Your Data Warehouse Settings](#) article.

For password requirements, please see the [Password Requirements](#) article.

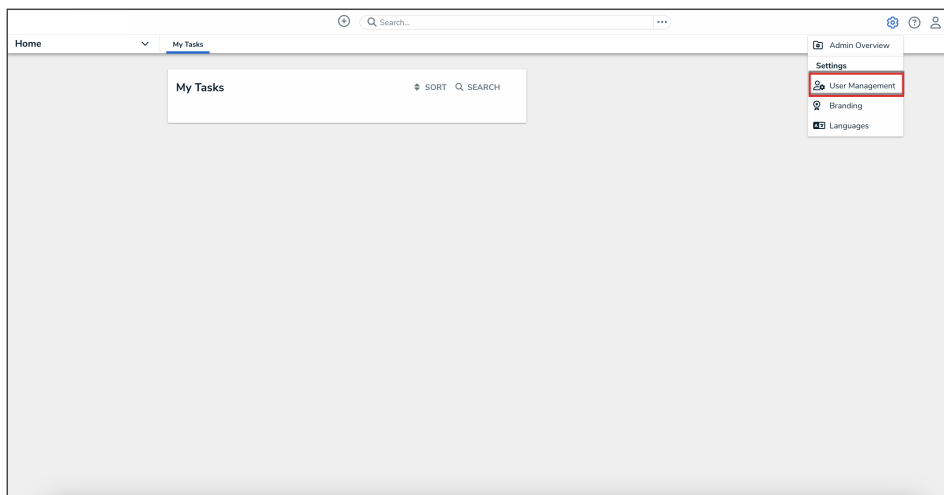

Navigation

1. From the **Home** screen, click the **Administration** icon.

Administration Icon

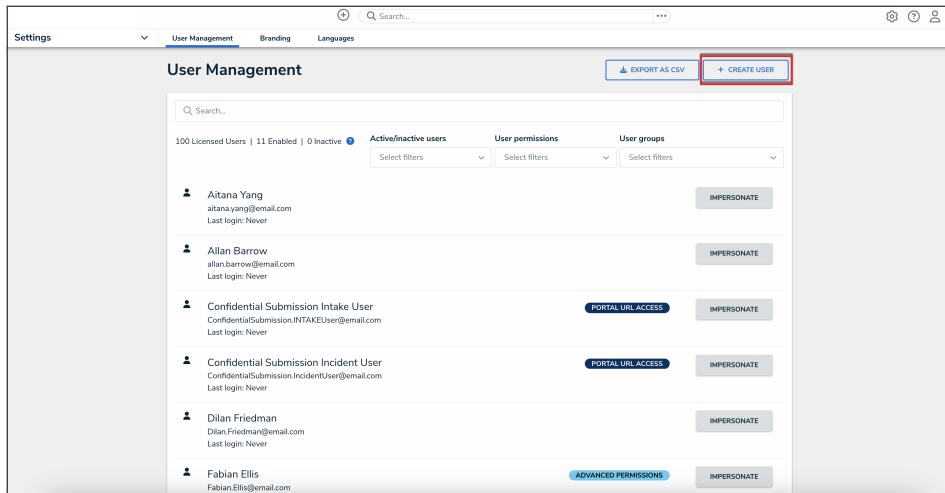

2. From the **Administrator Settings** menu, click **User Management**.

Administrator Settings Menu

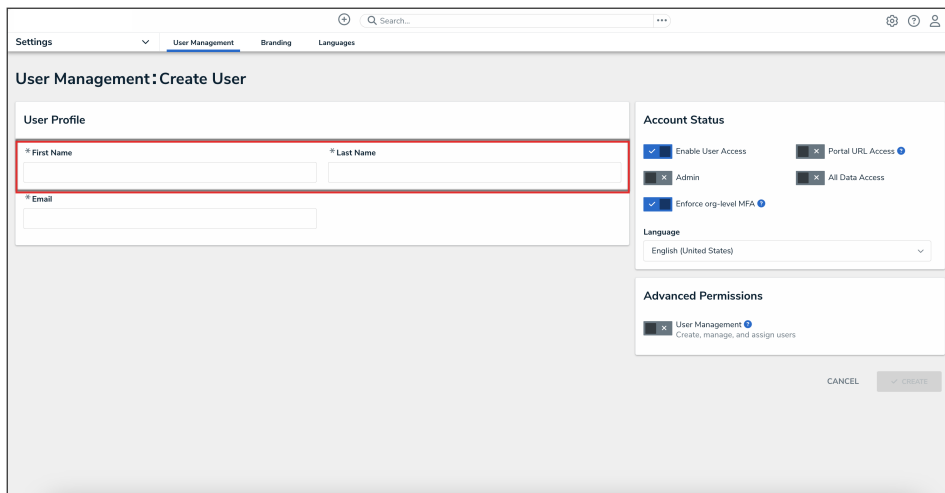

Creating a New User

1. From the **User Management** screen, click the **Create User** button.

Create User Button

2. Enter the user's name in the **First Name** and **Last Name** fields.

First and Last Name Fields

3. Enter the user's email address in the **Email** field. The email address is used to:

- Receive the Resolver sign-up email containing instructions on creating a new password and signing into Resolver.
- Authenticate the user when logging in to Resolver.

The screenshot shows the 'User Management: Create User' interface. The 'User Profile' section contains fields for '* First Name', '* Last Name', and '* Email'. The '* Email' field is highlighted with a red border. The 'Account Status' section includes toggle switches for 'Enable User Access' (checked), 'Portal URL Access' (unchecked), 'Admin' (unchecked), and 'All Data Access' (unchecked). There is also a checked toggle for 'Enforce org-level MFA'. A 'Language' dropdown menu is set to 'English (United States)'. The 'Advanced Permissions' section shows a checked toggle for 'User Management' with the description 'Create, manage, and assign users'. At the bottom right, there are 'CANCEL' and 'CREATE' buttons.

Email Field

4. **(Optional):** The following toggle switches are options settings and can give users absolute access or visibility in the system:

- **Enable User Access:** Click the **Enable User Access** toggle switch to deactivate the user account. By default, the user account is enabled.
- **Portal URL Access:** Click the **Portal URL Access** toggle switch to grant the user account access only to the Portal URL.
 - When you click the **Portal URL Access** toggle switch, the **Admin, All Data Access, Enforce Org Level MFA**, and **Advanced Permission** toggle switches will automatically be disabled.
- **Admin:** The Admin toggle switch gives users Administrative privileges with the potential to cause irreparable system damage.
- **All Data Access:** The All Access toggle switch allows Users to view, edit, and delete Objects and Object Types. The **All Data Access** toggle switch overrides Object Type Workflow permissions.

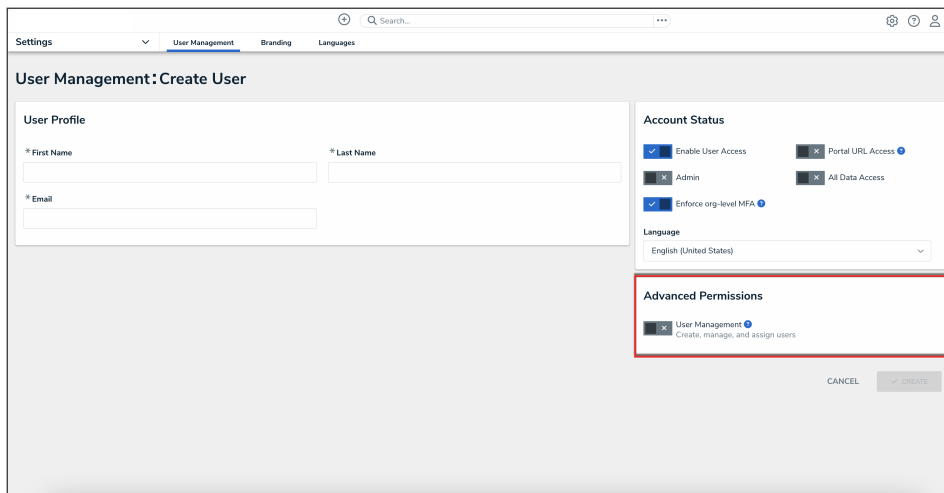

Warning:

Resolver recommends not enabling the **Admin** or **All Access** toggle switches on for new user accounts.

Optional Toggle Switches

5. **(Optional):** Select a language from the **Language** field dropdown menu to change the system's language setting. Before you can set an alternate language setting, an Administrator needs to download a Languages .csv file from the system, map language translations to the user interface text, and upload the .csv file for use within Resolver.
6. **(Optional):** Click the User **Management** toggle switch under the **Advanced Permissions** section to grant the user advanced permissions. Please see the [Assigning Advanced Permissions to a User](#) article for adding advanced permissions to a user.

Advanced Permissions

7. Click the **Create** button to create the new user account.

The screenshot shows the 'User Management: Create User' interface. At the top, there are navigation tabs for 'Settings', 'User Management', 'Branding', and 'Languages'. A search bar is located to the right of the tabs. The main content area is divided into three sections: 'User Profile', 'Account Status', and 'Advanced Permissions'. The 'User Profile' section contains three input fields: 'First Name' (with the value 'Test'), 'Last Name' (with the value 'User'), and 'Email' (with the value 'testuser@test.com'). The 'Account Status' section includes five toggle switches: 'Enable User Access' (checked), 'Admin' (unchecked), 'Enforce org-level MFA' (checked), 'Portal URL Access' (unchecked), and 'All Data Access' (unchecked). The 'Advanced Permissions' section has one toggle switch: 'User Management' (checked). At the bottom right, there are two buttons: 'CANCEL' and 'CREATE'. The 'CREATE' button is highlighted with a red rectangular box.
