

Adding a Multi-Series Chart to a Dashboard

Last Modified on 01/29/2025 4:42 pm EST

Overview

Resolver's Dashboard Builder allows Administrators to build custom Dashboards using the Dashboard Data Sets published within their Org.

Before using the Dashboards feature, at least one Dashboard Data Set needs to be created and published.

The following instructions apply to Multi-Series Bar, Multi-Series Line and Multi-Series Symbol Chart Types.

Multi-series Charts present a single value in more than one Category. Users must add a single **Category, Value** and **Series** field to create something similar to a Pivot Chart. A Multi-series Chart consists of two dimensions and a measure.

Warning:

All changes or edits made to a Chart are globally applied across all instances of the Chart unless you duplicate the Chart and apply changes or edits to the duplicated Chart.

User Account Requirements

The user account you use to log into Resolver must have Administrator permission to add a Multi-Series Chart to a Dashboard.

Related Information/Setup

To create a new Dashboard Data Set, please follow the link below:

• Create a New Dashboard Data Set

After creating a Dashboard Data Set, the user must publish it before it can be used with the Dashboard Data Set Builder. Please follow the link below for more information on Publishing a Dashboard Data Set.

• Publishing/Unpublishing a Dashboard Data Set

To add styles to your Chart, please follow the link below:

• Adding Styles to a Chart

Please see the corresponding articles below for Information on Adding a Chart Type not covered by these instructions.

- Adding a Chart to a Dashboard
- Adding a Combo Chart to a Dashboard
- Adding a Table to a Dashboard
- Adding a Crosstab to a Dashboard
- Adding a Heatmap to a Dashboard
- Adding a Map to a Dashboard
- Adding a Box and Whiskers Chart to a Dashboard

Adding a Multi-Series Chart to a Dashboard

For illustration purposes, we are going to use the Multi-Series Bar Chart Type in the instructions below. However, you can apply these instructions to Multi-Series Line and Symbol Chart Types.

1. From the *Canvas Layout* screen, click the **Add Chart** button.

Advanced Reporting Dashboard Data Sets Dashboard Builder Incident Management - Tracking Image: Ima

				Data	»
			Filter	Search Data	Q
			0	☆ Incident Management (82	084) >

Add a Chart Button

2. From the *Chart* screen, click on a **Dashboard Data Set** from the **Data Panel**.

Note:

Only published Dashboard Data Sets will appear on the Data Panel.

Multi-series Bar Chart

- Dashboard Data Set Categories and Values will appear under the Dashboard Data Set Name on the Data Panel.
 - **Categories (Blue):** Categories are text and data columns used to group data (e.g., Sales Region, Department Name, Order Dates, etc.).
 - Values (Green): Values are numeric columns used to calculate data. Values can also be aggregated (e.g., Average Price Per Product, Total Sales Revenue, etc.).
- Categories and Values have a Data Type icon next to the Dashboard Data Set Name.
 Data Type icons indicate the Category and Value Data Type:
- Text: 🗐
- Numeric: #
- Date:
- 8. Drag and drop a **Category** from the **Data Panel** onto the **Category** section at the bottom of the Chart (traditional x-axis) or within the **Category** field at the top.

Drag and Drop a Category

9. The **Category** data will populate the **Chart**. Bar Chart is the system default for Chart types.

 Drag and drop a Value from the Data Panel into the Value section at the Side of the Chart (traditional y-axis) or within the Value field at the top.

Drag and Drop a Value

11. Drag and drop a second Category from the **Data Panel** onto the **Series** field at the top.
