

Version 23.2ab Release Notes (Vendor Risk Management)

Last Modified on 10/23/2023 1:44 pm EDT

Improvements

- We fixed a typo in the Send Vendor Questionnaire email template within Vendor Risk Management.
- Vendor Criticality was added to the Vendor Assessment Planning step, allowing users to determine the criticality of a vendor.
- We removed the ability for a Vendor Contact to add issues from the Vendor Contact Consolidation form.
- The VRM - Archived Vendor Request and VRM - Create Vendor Request forms now have a (legacy) prefix.
- We've added the ability to export citation attachments from the VRM Questionnaire summary.
- Workflow control was removed from the Vendor Contact's header.
- Colored cells in VRM Reports were changed to ovals.
 - VRM - Vendor Risk Assessment Overview
 - VRM - Approved Requests
 - VRM - Approved Vendors
 - VRM - Archived Issues
 - VRM - Archived Vendor Assessments
 - VRM - Rejected Requests
 - VRM - Rejected Vendors
 - VRM - Resolver Content Quality Assurance
 - VRM - SIG Vendor Questionnaire (Vendor Risk Team)
 - VRM - Vendor Assessment - Resolver Content Quality Assurance Report
 - VRM - Vendor Questionnaire (Vendor Risk Team)
 - VRM - Vendor Questionnaire (Vendor)
- The Requestor role now has access to the new Vendor Assessment forms.
- The VRM - Questionnaire Summary form's orientation from portrait to landscape.
- We added the Vendor Reference to the Vendor Team form on the Vendor Assessment to give visibility into other vendor engagements.
- The Priority field on the Vendor Assessment - Summary Report Repeatable form is set to 0 by default.
- We relabeled the Desired Outcome formula on the Citation object type to Outcome.
- We removed the **Submit for Review** state trigger from the Vendor Assessment - Vendor Team - Planning form.
