# Version 23.3ab Release Notes (Incident Management)

## Improvements

- An Administrator can archive Person records on the following Forms:
    - Person – CC – Edit
    - Person – IRM – Edit
- We have updated the Incident – IM – 2 – Employee Submission form:
    - **New Fields:** Added the **Type of Observation**, **Injury Type**, and **Type of Security Concern** fields.
    - **Removed:** We removed the **Save as Draft** button.
    - **Edited:** The Observation Type field and adjusted the form and conditional fields based on the **Observation Type** field.
- After a User creates an Incident, the IM – 6 form will open instead of the IM – 5 form. The IM – 5 form was removed from the system.
- The Organization – IM – Edit form was modified according to the new design practices.
- We updated the Review Required trigger on the Under Investigation state on the Incident Workflow, changing it from REVIEWREQUIRED == 1 to REVIEW REQUIRED >=.
- We removed the Close Date Trigger on the Open state on the Incident Workflow.
