

# **Creating a Login Statement**

Last Modified on 03/19/2024 4:31 pm EDT

# Overview

Administrators can add a custom statement that appears when a user logs into the system. Custom statements can also have a frequency which controls when a statement will appear.

The Custom Login Statement is organization specific. If users have access to multiple orgs, they will be required to select the org, then the Custom Login Statement will be displayed.

*Note:* The Custom Login Statement does not replace Resolver's Terms of Service.

### **User Account Requirements**

The user account used to log into Resolver must have Administrator permission to access the custom login statement settings feature.

## **Related Information/Setup**

Please refer to the Editing a Login Statement article for more information on editing a login statement.

Please refer to the Deleting a Login Statement article for more information on deleting a login statement.

### Navigation

1. From the *Home* screen, click on the **Systems** icon.

Systems Icon

2. From the *Admin: Overview* screen, click the **Custom Login Statement Settings** tile under the *Communications* section.
