

Version 25.2.1.3 Release (Dispatch)

Last Modified on 01/09/2026 4:40 pm EST

New Feature

- Administrators can increase the authentication timeout interval in Officer Mobile by submitting a request to Resolver Support. Once logged in, Officers will not have to log back in for the duration of the authentication timeout interval (e.g., 8hrs). By default, the authentication timeout interval will be set to 60 minutes. The authentication timeout interval will apply only to the Officer Mobile application.

Improvements

- The Auto-Close feature for Officer-created Dispatches will now default the Report to Follow field to No.

Dispatch Bug Fixes

- The ***Schedule Dispatch*** screen can be accessed when it contains records with the Recurrence field set to None.
- Activities with an on-the-fly location will successfully migrate to Resolver Core.
- A Connector will now indicate when the wrong Tenant ID is used within the Connector configuration.
